Africana Studies Courses

AFAS 101 - Intro to Africana Studies

Provides an overview of the experience, culture, and political practices of African descendants in the Americas and the Caribbean. The course uses a multidisciplinary approach to introduce students to the history, art, music, and literature of the African Diaspora.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

AFAS 201 - Cross Currents in AFAS

With a temporal focus on the 20th century, this course critically explores and analyzes the cultural, political and intellectual practices of blacks in North, Central, and South America as well as in the Caribbean.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

AFAS 250 - African American Herstories

Students gain insights into three distinct historical periods of African American (American) History and a cross section of African American life through the reading, analysis, and discussion of selected African American women's autobiographies.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

AFAS 295 - Special Topics in AFAS

Provides student with the opportunity to explore specific topics in Africana Studies. Courses focus on such issues as Caribbean literature, Latin American History and Political, Black Women's History in the U.S. the Harlem Renaissance, and Blacks in Science. Uses lectures, films, and discussions. May be repeated for credit.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

AFAS 298 - Independent Study for Minors

Independent study allows students to work one on one with professors in a specific area of Africana Studies. It is designed for minors but non-minors may ask for special permission from the director. Students' past topics have included comparative women's history, race and science, and entrepreneurship of color. May be repeated twice for credit.

Credits: .50 to 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

AFAS 301 - Politics of Hip Hop

This class is an interdisciplinary, socio-historical introduction to rap music and hip hop culture. Several themes will be explored including the origins of rap music as well as the role of urban youth and their notions of race and gender. Record industry practices will also be investigated together with the impact of commercialism on hip hop. We will also consider sexism, misogyny, and violence in both the music and culture.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

AFAS 310 - Women, Crime, & History

This class will examine gender, race and crime in US history. Specifically, we will explore the experience of female criminals from the colonial period to the present. We will conduct primary research into this subject at the Philadelphia City Archive (PCA), located at 3101 Market Street. Students will be responsible for a final research paper based on their research findings.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

AFAS 385 - Rum, Rice and Revolution: Caribbean History

Course provides a broad, interdisciplinary and socio-historical introduction to the Caribbean. Several themes are covered including empire and the making of the Caribbean; slavery and emancipation; labor formation and race; revolution and resistance; gender oppression and women's experiences; and cultural expressions.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

AFAS 395 - Special Topics in AFAS

Provides students with the opportunity to explore specific topics in Africana Studies - but is an upper division course. Courses focus on such issues as Caribbean literature, Latin American History and Politics, Black Women's History in the US, the Harlem Renaissance, and Blacks in Science. Uses lectures, films, and discussion. May be repeated up to three times for credit if topics vary.

Credits: 3.00

College: College of Arts and Sciences

Department: Afro-American Studies

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Anthropology Courses

ANTH 101 - Introduction to Cultural Diversity

Examines the diversity that exists in human culture. Uses lectures, films, and discussions to examine and illustrate the relationship between humans and their social/cultural systems.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

ANTH 110 - Human Past: Anthropology and Prehistoric Archeology

Examines human origins from the australopithecines to the present, including both the physiological and archaeological records. Discusses new finds and new interpretations of evolution.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

ANTH 120 - Biblical Archaeology Israel/Jordan

Examines the archaeology of Israel and Jordan from the earliest human occupation until the Persian Conquest in 535 B.C. Discusses many places described in the Old Testament in an archaeological context.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

ANTH 210 - Worldview: Science, Religion and Magic

Examines anthropological and archaeological evidence of the worldviews of non-literate people, as shown in the practice of ceremony, magic, sorcery, and witchcraft, and the role of shamans and priests.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 212 - Topics in World Ethnography

Examines the peoples and cultures of the selected cultural areas. Emphasizes indigenous cultures and the effects of modernization on these cultures.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

ANTH 215 - Anthropology of Gender

This course takes an ethnographic approach to the study of gender socializations and gender roles. We will address issues of sex roles, the cultural construction of gender categories, the forms of gender inequality, and the ways cultures engage in gender based power relationships. While these issues will be dealt with in specific and local ethnographic contexts, students will be encouraged to make comparisons across the contexts and to compare these works with their own experience.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

ANTH 220 - Aging in Cross-Cultural Perspective

Examines the status, roles, and treatments of elderly people in various societies throughout the world and among minority groups in the United States.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 240 - Urban Anthropology

This course will give students the opportunity to familiarize themselves with the major themes in urban anthropology and how they relate to other areas of research in anthropology and the social sciences in general. Students will focus on the research methods used by urban anthropologists as well as read different ethnographic cases of urban life.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

ANTH 255 - Psychological Anthropology

The course is an overview of the field of Psychological Anthropology. It examines issues live nature vs. nurture; personality and "madness"; ethnopsychologies; and cognition. The attempt is to always recognize the salience and significance of culture when considering these issues.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 310 - Society In Transition: Modern and Third World

Looks at the impact of 20th-century technology on traditional societies. Uses area studies from Africa, Asia, and elsewhere to explore institutions such as the family, the polity, the economy, and religion.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 312 - Approaches to Intercultural Behavior

Examines theory and case studies related to working and living outside the United States. Includes topics such as culture shock, cultural relativity, and ethnocentrism. Selects specific geographic culture areas for case studies.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

ANTH 330 - Media Anthropology

This course will introduce students to the anthropological study of media including traditional forms of mass media as well as new media such as the Internet. Students will be exposed to the theories and methodologies of media study from an anthropological perspective.

Students will also engage in their own ethnographic studies of media to gain first hand experience with the methods of anthropology.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

ANTH 355 - Anthropology of Cyberspace

This course will focus on how the internet and new media have changed the way we think about space and time, the ways we work and engage in leisure activities. We will bring the approach of anthropology to the study of these new media in order to ask key questions about social life.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

ANTH 360 - Culture and the Environment

This course explores the interplay between culture and the environment by examining both ethnographic accounts from around the world and archeological materials from the last 14,000 years. Special attention is paid to the changing cultural view of the environment over the last two centuries.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

ANTH 363 - Sacred Traditions of the East

This course introduces the student to sacred traditions of Asia: Hinduism, Buddhism and Confucianism. It will attempt a historical-comparative investigation of these traditions. It will emphasize the practice and philosophical underpinnings of these traditions, as well as the interplay between integration of the folk or popular aspects and the abstracts or esoteric.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

ANTH 365 - Family and Kinship

The course investigates the concepts of family and kinship from an anthropological perspective. It looks at the family as a critical and contradictory location at the intersection of global and transnational forces. Using anthropological concepts such as status and role, it will explore changing gender relationships, sexual expression, parenting and aging.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

ANTH 370 - Ethnographic Methods

The course introduces students to ethnographic research methods through eight hands-on assignments: 1) selecting a site; 2) establishing rapport; 3) operationalizing hypotheses; 4) using qualitative and quantitative data gathering techniques; 5) taking field notes; 6) analyzing data collected; 7) synthesizing these data; and 8) writing an ethnographic report.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

ANTH 380 - Special Topics in Anthropology

This course will explore current issues and debates in Anthropology. It will be conducted as a seminar. The topic will vary each term.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 390 - Seminar in Ethnography

The Seminar in Ethnography is a course for anthropology majors. This is a peer-mentoring practicum where students are given the opportunity to present their own ethnographic fieldwork and get feedback from other students in the seminar. All anthropology majors will be in the seminar together. Juniors and seniors will be presenting mature research as well as mentoring the freshmen and sophomores.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Anthropology

ANTH 410 - Cultural Theory

Explores controversial issues and questions, such as sociobiology and what it means to be human, as they have been and are being studied by those concerned with human origins and development. Reviews major thinkers in the history and theory of anthropology, including modernists and postmodernists.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

ANTH 499 - Directed Studies in Anthro

Provides supervised study of special subjects in anthropology. See department for topics and terms offered.

Credits: .50 to 12.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Arabic Courses**ARBC 101 - Arabic I**

Introductory Arabic includes listening, speaking, reading and writing. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

ARBC 102 - Arabic II

Continues ARBC 101. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: ARBC 101 Minimum Grade: D

ARBC 103 - Arabic III

Continues ARBC 102. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: ARBC 102 Minimum Grade: D

ARBC 201 - Arabic IV

Introductory Arabic class. Includes listening, speaking, reading and writing, with individual audio lingual practice.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: ARBC 103 Minimum Grade: D

ARBC 202 - Arabic V

Continues ARBC 201. Introductory Arabic class. Includes listening, speaking, reading and writing, with individual audio lingual practice.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: ARBC 201 Minimum Grade: D

ARBC 203 - Arabic VI

Continues ARBC 202. Introductory Arabic class. Includes listening, speaking, reading and writing, with individual audio lingual practice.
Credits: 4.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 202 Minimum Grade: D

ARBC 301 - Arabic VII

Advanced Arabic. Includes reading, writing, and extensive conversational practice.
Credits: 3.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 203 Minimum Grade: D

ARBC 302 - Arabic VIII

Continues ARBC 301. Provides advanced practice in translation, comprehension, and written and oral conversation.
Credits: 3.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 301 Minimum Grade: D

ARBC 303 - Arabic IX

Continues ARBC 302. Provides advanced practice in translation, comprehension, and written and oral conversation.
Credits: 3.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 302 Minimum Grade: D

ARBC 399 - Arabic Adv Independent Study

Provides supervised study of special topics in Arabic language and literature. Scheduled as needed. May be repeated for credit.
Credits: .50 to 12.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 303 Minimum Grade: D

ARBC 411 - Arabic - Introduction to Arabic Stylistics

Fourth year of Arabic -- provides advanced practice in translation, comprehension, and written and oral communication.
Credits: 4.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 303 Minimum Grade: D

ARBC 471 - Arabic Civilization

ARBC 471 presents an integrated approach in Arabic to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values.
Credits: 4.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Pre-Requisites: ARBC 303 Minimum Grade: D

ARBC 480 - Arabic Minor Thesis Course

Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
Credits: 4.00
College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Arts & Sciences-Interdisciplinary Studies Courses

AS-I 103 - AIDS 101

Offers a multidisciplinary approach to studying the aids epidemic. Includes service-learning as a means of understanding and affecting the epidemic.
Credits: 3.00
College: College of Arts and Sciences
Department: COAS Admin (Humanities) Hist
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

AS-I 180 - Interdisciplinary Study in the Arts & Sciences

Designed for courses that offer a multidisciplinary approach to the study of issues and topics in the Arts and Sciences.
Credits: 1.00 to 3.00
College: College of Arts and Sciences
Department: Office of the Dean, Arts & Sci
Restrictions:
Must be enrolled in one of the following Program Level(s):
Graduate Quarter
Undergraduate Quarter

AS-I 265 - Spec Interdis St Arts/Sci

Credits: .50 to 6.00
College: College of Arts and Sciences
Department: COAS Admin (Humanities) Hist
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

Bioscience & Biotechnology Courses

BIO 102 - Biology I: Cells and Tissues

Covers function of cells and tissues at the molecular, cellular, and organ level, with emphasis on human physiology.
Credits: 4.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not be enrolled in one of the following Major(s):
Biological Sciences
Co-Requisites: EXAM 080

BIO 104 - Biology II: Growth and Heredity

Covers growth and development of selected lower and higher organisms, with emphasis on the replication, transmission, and regulation of genetic material.
Credits: 4.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not be enrolled in one of the following Major(s):
Biological Sciences
Co-Requisites: EXAM 080

BIO 106 - Biology III: Organismal Biology

Examination of the various forms of life, with emphasis on evolutionary relationships, environmental interaction, and economic importance.
Credits: 4.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not be enrolled in one of the following Major(s):
Biological Sciences
Co-Requisites: EXAM 080

BIO 121 - Physiology and Nutrition

An introduction to the physiological systems of animals with particular attention to the role nutrients play in maintaining proper function. Systems covered include digestive, respiratory, circulatory, and excretory. Control mechanisms to maintain homeostasis are included. The structure and function of nutrient molecules and their food sources will be examined.
Credits: 4.50
College: College of Arts and Sciences

Department: Bioscience & Biotechnology
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Co-Requisites: EXAM 080

BIO 122 - Cells and Genetics

An introduction to the concepts of cell and function, cell and reproduction, cell communication, genetic inheritance, and population genetics. The relevance of genetics to society and ethical issues are included.
Credits: 4.50
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Co-Requisites: EXAM 080
Pre-Requisites: BIO 115 Minimum Grade: D or BIO 121 Minimum Grade: D or TDEC 122 Minimum Grade: D

BIO 123 - Organismal Diversity & Ecology

An exploration of the diversity of organisms and their interactions in the biosphere. Using an evolutionary perspective, representative organisms from the three domains of life will be examined plus viruses and prions. Behavioral, population, and community ecology will be investigated as well as the environmental impact of human activity.
Credits: 4.50
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Co-Requisites: EXAM 080
Pre-Requisites: BIO 117 Minimum Grade: D or BIO 122 Minimum Grade: D

BIO 141 - Essential Biology

Credits: 4.50
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
Must be enrolled in one of the following College(s)/School(s):
College of Engineering
Sch.of Biomed Engr,Sci & Hlth
May not be enrolled in one of the following Major(s):
Computer Science
Co-Requisites: EXAM 080
Pre-Requisites: CHEM 102 Minimum Grade: D

BIO 151 - Applied Biology

Provides an introduction to biology with an emphasis on application in modern society. Presents energy flow through biological systems as the focus through which genetics, cellular and tissue metabolism, and ecosystems can be analyzed and understood. Examines examples relevant to biotechnology, medical ethics, and ecological issues.
Credits: 3.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not be enrolled in one of the following Major(s):
Biological Sciences
Co-Requisites: EXAM 080

BIO 153 - Anatomy and Physiology I

Introduction to the basics of human anatomy and physiology with an emphasis on topics of special interest to those in clinical curricula (including medical terminology and clinical applications). Anatomy and Physiology I concentrates on tissue, musculoskeletal, and nervous anatomy and physiology.

Credits: 4.50

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: (BIO 121 Minimum Grade: D or BIO 115 Minimum Grade: D) and CHEM 101 Minimum Grade: D

BIO 154 - Anatomy and Physiology II

Introduction to the basics of human anatomy and physiology with an emphasis on topics of special interest to those in clinical curricula (including medical terminology and clinical application). Anatomy and Physiology II concentrates on endocrine, cardiovascular, respiratory, renal, gastrointestinal, and reproductive anatomy and physiology.

Credits: 4.50

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 153 Minimum Grade: D

BIO 161 - General Biology I

Covers structure and function of the cell and the organ-system plan of organization of the human body. Fall.

Credits: 3.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

BIO 162 - General Biology II

Continues BIO 161. Covers the mechanics of heredity, including growth, differentiation, and development. Winter.

Credits: 3.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 161 Minimum Grade: D

BIO 163 - General Biology III

Continues BIO 162. Covers the plant and animal kingdoms, radiobiology, evolution, and ecology. Spring.

Credits: 3.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 162 Minimum Grade: D

BIO 201 - Human Physiology I

Intensive survey of the basic physiological mechanisms of cellular and human electrophysiology and the physiology of the muscular, cardiovascular, respiratory, renal, and gastrointestinal systems.

Credits: 4.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: BIO 204 Minimum Grade: D or BIO 214 Minimum Grade: D or TDEC 122 Minimum Grade: D

BIO 202 - Human Physiology Laboratory

Laboratory course in human physiology. Designed to accompany BIO 201 and 203 Human Physiology I and II. Uses simulation, experimenters and data acquisition techniques to provide practical experience in the design and execution of physiological experiments and analysis of physiological data.

Credits: 2.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 201 Minimum Grade: D

BIO 203 - Human Physiology II

Intensive survey of the control mechanisms of cellular and human physiology including introductions to control theory, neurophysiology, endocrine control, and control mechanisms in locomotion, cardiovascular, respiratory, renal, acid/base, gastrointestinal, and reproductive physiology.

Credits: 4.00

College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: BIO 201 Minimum Grade: D

BIO 210 - Biology of Cancer

An introduction to the biological basis of cancer. Topics include: a descriptive overview of cancer development; the genetic basis of the disease; familial cancer; chemical and other carcinogens; risk factors associated with cancer; preventive measures, current and future treatments; and nutritional aspects of cancer prevention treatment.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 122 Minimum Grade: D or BIO 117 Minimum

Grade: D

BIO 212 - Biotechnology

Covers the use of recombinant DNA techniques in biotechnology. Explores the many uses of biotechnology in the biological, agricultural and medical field. Also covers the social, ethical and environmental issues involved in this discipline.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 117 Minimum

Grade: D or BIO 122 Minimum Grade: D or TDEC 122 Minimum Grade:

D

BIO 214 - Principles of Cell Biology

The course familiarizes students with the basic fundamentals and principles of cell biology. Topics include protein and enzymes as metabolic facilitators, the source and function of cellular energy, cell structure and function, cellular protein transport, cell communication, cell cycle control, apoptosis, and cell differentiation.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 122 Minimum

Grade: D or TDEC 122 Minimum Grade: D or BIO 117 Minimum Grade:

D

BIO 215 - Techniques in Cell Biology

A course designed to introduce students to the lab techniques used by cell biologists. Microscopy is used for cell structure and their organelles, phagocytosis, cytoskeletal structure, muscle contraction and cell motility. Other topics include fractional by centrifugation, protein separation and quantification, and gel electrophoresis.

Credits: 2.50

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 122 Minimum Grade: D or TDEC 122 Minimum Grade: D or BIO 117 Minimum Grade: D

BIO 218 - Principles of Molecular Biology

The course is designed to familiarize students with the details and concepts revolving around molecular biology's central dogma. Specifically the chemical nature of DNA and RNA, the molecular structure of DNA and chromosomes, the definition of a gene, how DNA is replicated, and how genes are expressed and regulated.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 122 Minimum

Grade: D or TDEC 122 Minimum Grade: D or BIO 117 Minimum Grade:

D

BIO 219 - Techniques in Molecular Biology

Designed to familiarize student with laboratory techniques utilized in molecular biology, specifically DNA isolation, characterization, and manipulation. Students work in teams to collect and analyze data and explain results in laboratory reports. Weekly recitations preview and review theory and techniques used in the lab.

Credits: 2.50

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 218 Minimum Grade: D

BIO 221 - Microbiology

Covers morphological, physiological, and biochemical characteristics of bacteria, fungi, algae, protozoa, and viruses. Introduces the principles of microbial genetics, disease, and control of microorganisms.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: BIO 122 Minimum Grade: D or BIO 117 Minimum

Grade: D or BIO 114 Minimum Grade: D

BIO 226 - Microbiology for Health Prof'l

An introduction to microbiology for students in the health professions. Covers the diversity of microorganisms, their growth and how to control them. An introduction to the principles of disease and pathogenicity, host interaction and immunological response. Laboratories focus on the basic techniques to culture and student microorganisms.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

BIO 231 - Cell Physiology

Molecular biology of the cell, including regulation of function, genetic mechanisms, chemistry and structure of cellular components, and cell-to-cell interactions

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

BIO 244 - Genetics I

Surveys Mendelian, microbial, molecular, and population genetics. Discusses model systems and analytical methods used by geneticists to understand gene functions at cellular, organismal, and population levels.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum

Grade: D

BIO 254 - Invertebrate Morph & Phys

Provides comparative study of the major invertebrate groups, relationships between physiology and organismal structure, phylogenetic relationships and classification, development, and life histories.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: (BIO 123 Minimum Grade: D or BIO 114 Minimum

Grade: D)

BIO 256 - Vertebrate Morph & Phys

Provides comparative study of the major vertebrate groups, relationships between physiology and organismal structure, evolutionary history, comparative anatomy, and development.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 123 Minimum Grade: D or BIO 114 Minimum Grade: D

BIO 260 - Plant Biology I

This course provides an understanding of phylogenetic relationships among plant families. Students see the practical results of evolution by examining and comparing the properties of existing plant families.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 106 Minimum Grade: D or BIO 123 Minimum

Grade: D or BIO 114 Minimum Grade: D

BIO 262 - Plant Biology II

In this course, students learn the structure and function of higher vascular plants as organisms. Plant development, growth and behavior are examined at both the molecular and structural levels to give a comprehensive view of the plant and its environment.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 106 Minimum Grade: D or BIO 123 Minimum

Grade: D or BIO 114 Minimum Grade: D

BIO 264 - Ethnobotany

This course explores the relation between ancient/cultural botanical knowledge and its current application in modern pharmacology and alternative forms of medicine. It provides an interdisciplinary approach to the study of plants for food, medicine, stimulation, religious rituals and death.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

BIO 270 - Development Biology

Covers molecular, cellular and physiological mechanisms underlying development of animals from gametes to adults. Covers the major stages and selected aspects of vertebrate development in importance animal model systems. Particular focus in on the importance of differential gene expression and its regulation in development.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: (BIO 214 Minimum Grade: D and BIO 218 Minimum Grade: D) or (BIO 204 Minimum Grade: D and BIO 206 Minimum Grade: D)

BIO 271 - Developmental Biology Laboratory

Includes observations into development processes in a diverse group of organisms including developmental principles in simple multicellular protists, gametogenesis in diverse animal, fertilization in sea urchins, embryonic development of vertebrates, regeneration of planarians, and the role of gene regulation in fruit fly development.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 270 Minimum Grade: D

BIO 306 - Biochemistry Laboratory

Covers biochemical techniques ranging from basic laboratory preparatory work such as making solutions to the measurement of enzyme kinetics and substrate specificity.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: CHEM 242 Minimum Grade: D

BIO 310 - Comparative Physiology

Provides comparative study of the physiology of vertebrate and invertebrate animals. Examines physiological principles by studying cardiovascular adaptations, water balance, respiratory adaptations, and other homeostatic mechanisms in model systems, including fish, amphibians, mammals, birds, and invertebrates.

Credits: 4.50

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: (BIO 123 Minimum Grade: D or BIO 114 Minimum Grade: D)

BIO 311 - Metabolism

Covers bioenergetics and metabolism; enzymes, substrates, products, coenzymes, transporters, pathways (catabolic and anabolic for carbohydrates, lipids, amino acids, and nucleotides). Intracellular regulation, intercellular regulation, and how all this serves to meet the need of the cell and organism.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: CHEM 242 Minimum Grade: D

BIO 312 - Genetically Modified Foods

Covers the application of recombinant DNA techniques in the creation of genetically modified foods. Explores the many uses of these food. Also covers the social, ethical and environmental issues involved in the use of genetically modified foods.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 117 Minimum Grade: D or BIO 122 Minimum Grade: D

BIO 320 - Mech Of Microb Pathogenicity

Covers mechanisms of pathogenesis in microbial disease: transmission, prevention, public health. Also covers molecular basis of microbial pathogenesis.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum Grade: D

BIO 322 - Mycology

Covers morphology, taxonomy, and physiology of yeasts and molds, with emphasis on species of economic importance; plant and animal pathogens; industrial fermentations; toxin production; decomposition of organic materials; and fungal morphogenesis.

Credits: 4.50

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 221 Minimum Grade: D

BIO 331 - Bioinformatics I

Covers the tools and the applications of computer-aided representation, archiving, accession, manipulation, and analysis of biological data. Bioinformatics I provides an overview of information theory and computer-aided analysis of biomolecules (nucleic acids, proteins and polysaccharides) and its application for computer-aided recombinant DNA research.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

BIO 332 - Bioinformatics II

This course continues the application of computational algorithms for manipulation and analysis of biological information covered in BIO 331 (Bioinformatics I). It covers genomic and proteome informatic approaches and applications for determining evolutionary relationships, discovery of protein structure/function relationships and bioengineering of proteins by molecular modeling by homology

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Pre-Requisites: BIO 331 Minimum Grade: D

BIO 333 - Bioinformatics Laboratory

A laboratory course to accompany BIO 331 Bioinformatics I. Designed to familiarize students with the computational tools used to analyze large datasets generated by high throughput biotechnology. Includes algorithms to analyze nucleic acid and protein sequences, 3D molecular structures, phylogenetic trees, and microarray data.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: BIO 331 Minimum Grade: D

BIO 368 - Embryology

This course surveys general features of developing systems, and focuses on the developmental history of adult structures and functions in humans. Human developmental defects are also discussed.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: BIO 214 Minimum Grade: D or BIO 204 Minimum Grade: D

BIO 384 - Biology of Stress

This course focuses on the biological responses to the physical and psychological stress, discussing in turn stress responses in various organ systems. Emphasis is given to the analysis and evaluation of conflicting biological evidence on stress effects.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Must have the following Classification(s):

Junior

Senior

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 122 Minimum Grade: D or TDEC 122 Minimum Grade: D or BIO 117 Minimum Grade: D

BIO 404 - Structure and Function of Biomolecules

Covers the weak interactions which govern structure and function of biomolecules, including amino acids, proteins (structural organization, isolation, and methods of analysis). Enzymes (structure, catalytic mechanisms, kinetics), lipids and biomembranes, and DNA and RNA folding.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: (BIO 104 Minimum Grade: D or BIO 117 Minimum Grade: D or BIO 122 Minimum Grade: D) and CHEM 242 Minimum Grade: D

BIO 406 - Computational Biochemistry Lab

This course uses kinetic analysis of biochemical data to increase the computational and numerical sophistication used to build sound models of the underlying biological processes. Students start with Excel as the analytical tool. MATLAB is then used as the complexity of the problems demands it.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: BIO 303 Minimum Grade: D or BIO 404 Minimum Grade: D

BIO 412 - Biology of Aging

Discusses ageing at the organismal, organ, cellular, and molecular levels. Discussions include chronological versus biological aging, normal and abnormal human physiology of aging, current theories of aging, the effect of caloric restriction on aging, and the molecular mechanisms that underlie normal and abnormal aging.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: BIO 404 Minimum Grade: D or BIO 303 Minimum Grade: D

BIO 415 - Proteins

Discusses protein structure, function, and isolation. Emphasizes biochemical, biophysical, and molecular biological techniques.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

Pre-Requisites: BIO 404 Minimum Grade: D or BIO 303 Minimum Grade: D

BIO 420 - Virology

Discusses the major viral groups, including biochemistry and molecular genetics of viral replication, structure, gene expression, latency, and role in disease.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 214 Minimum Grade: D or BIO 218 Minimum

Grade: D or BIO 204 Minimum Grade: D or BIO 206 Minimum Grade: D

BIO 421 - Biomembranes

The experimental and theoretical basis for the structure and function of biological membranes will be surveyed. Topics include membrane self assembly, bilayer phase behavior and dynamics, membrane protein structure, passive and active transport, membrane fusion and trafficking.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: BIO 404 Minimum Grade: D or BIO 303 Minimum

Grade: D

BIO 424 - Microbial Physiology

Covers physiology and metabolism of microorganisms with emphasis on aspects unique to prokaryotes, including envelope structure, transport systems, modes of nutrition, biosynthesis, growth, and mechanisms of action of antibiotics.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 221 Minimum Grade: D

BIO 426 - Immunology

Covers modern concepts in immunology, including immunologic phenomena, biochemistry of antigens and antibodies, immunologic methods, cellular and genetic components of the immune response, immunopathology, transplantation, and cancer immunology.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 104 Minimum Grade: D or BIO 117 Minimum Grade: D or BIO 122 Minimum Grade: D

BIO 433 - Advanced Cell Biology

Course covers chemical composition and cellular function of organelles and other cellular structures, intra- and inter- cellular regulatory processes, intercellular communication, genetic mechanisms and analytical techniques.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Graduate Quarter

Undergraduate Quarter

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Senior

Pre-Requisites: BIO 215 Minimum Grade: D

BIO 434 - Advanced Cell Biology Lab

Course covers fundamentals of growth, division and homeostasis of mammalian cells grown in culture. Students perform experiments on cells to monitor cellular morphology, including subcellular structures and specific regulatory proteins. Techniques include fluorescent microscopy, cell transfection and subcellular fractionation.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Graduate Quarter

Undergraduate Quarter

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Senior

Pre-Requisites: BIO 433 Minimum Grade: D and BIO 215 Minimum

Grade: D

BIO 440 - Biometry

Second course in statistics, with emphasis on theory, complex parametric designs, power analyses, resampling statistics, linear models, computations in SAS and in programming.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 441 Minimum Grade: C

BIO 441 - Data Analysis

First course in statistics, introduction to probability, estimation, hypothesis testing, regression, ANOVA, chi-square, computations in SAS.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

BIO 442 - Modeling Methods in Biology I

Offers practical experience in the modeling of simple biological systems, including the applications of linear, trigonometric, and exponential functions in biology and the use of differential and integral calculus, simple differential equations, and the Eulerian approach to simulation. Emphasizes practical computational use of such tools in biological problems. Offered in alternate years.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

BIO 443 - Modeling Methods in Biology II

Offers a practical introduction to the modeling of dynamic biological processes, including deterministic and stochastic processes. Emphasizes the development and construction of working models and the interpretation of results. Discusses both mechanistic and empirical/predictive models. Students develop their own model of a real-world biological process. Offered in alternate years.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

BIO 444 - Human Genetics

Covers the fundamentals and principles of genetics with an emphasis on their relevance to human genetics and disease. Topics include human genetic disorders, pedigree analysis and genetic testing, cytogenetics, epigenetics, genetics of cancer, gene therapy, stem cell research, human genomics and biotechnology.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 244 Minimum

Grade: D or BIO 206 Minimum Grade: D

BIO 445 - Microbial Genetics

Covers genetic organization and regulation in bacteriophage and bacteria, techniques of genetic manipulation of microbial genomes,

genetic interactions of microbes under natural conditions and the use of microbial genome modification in industry.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum

Grade: D

BIO 447 - Adv Genetics & Molecular Bio

Covers classical prokaryotic and eukaryotic genetics; DNA/RNA structure; DNA replication, transcription, translation and regulation of these processes. Also covers major molecular techniques used for characterizing prokaryotic and eukaryotic genes, tools for analysis of genomes, and applications of molecular genetics research.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Junior

Senior

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum

Grade: D

BIO 449 - Recombinant DNA Laboratory

Covers procedures of DNA isolation and purification, insertion of DNA sequences into plasmid cloning vectors, introduction of plasmids into appropriate host cells, and methods of recovering and analyzing cloned DNA.

Credits: 5.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum

Grade: D

BIO 451 - Genetic Reg Development

Covers molecular and genetic control of morphogenesis and cellular differentiation. Focuses on differential gene function and the interaction between the nucleus and the cytoplasm.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: (BIO 218 Minimum Grade: D or BIO 206 Minimum Grade: D) and BIO 270 Minimum Grade: D

BIO 460 - Evolution

Examines historical evidence for and principal mechanisms of organic evolution, the origin of life and new groups of organisms in the past and present, and the genetic basis for evolution. Discusses current research in evolutionary biology and ecology.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Junior

Senior

Pre-Requisites: BIO 218 Minimum Grade: D or BIO 206 Minimum Grade: D

BIO 462 - Biology of Neuron Function

Covers molecular and cellular mechanisms underlying neuron function. Topics include: molecular and cellular biology of neurons and neural development; molecular biology and physiology of sensory and motor neurons; molecular biology of muscle function; molecular and cellular basis of learning and memory in model organisms.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 201 Minimum Grade: D

BIO 463 - Mol Mech of Neurodegeneration

This is an advanced course on the current, primary literature in the area of neurodegeneration. Students are expected to be conversant in areas of Genetics, Cell Biology, Molecular Biology, Biochemistry, and Neurobiology. This is a discussion course based on reading current manuscripts from the primary literature.

Credits: 3.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: BIO 432 Minimum Grade: D

BIO 464 - Animal Behavior

Studies the mechanisms and evolution of behavior of animals in relation to their natural environment, including genetics, physiology, and ecology of behavior. Includes laboratory exercises consisting of films, demonstrations, and observational studies at the Philadelphia Zoo and in natural habitats.

Credits: 4.50

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Junior

Senior

Pre-Requisites: (BIO 218 Minimum Grade: D or BIO 206 Minimum Grade: D) and BIO 203 Minimum Grade: D

BIO 466 - Endocrinology

Describes the classical hormones, their regulation and major clinical abnormalities. New directions in endocrinology, such as cellular regulation and cellular mediators of hormonal action are also considered. The major focus of the course will be on mammals, although some examples involving other vertebrates are included.

Credits: 4.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: BIO 122 Minimum Grade: D or BIO 104 Minimum Grade: D or BIO 117 Minimum Grade: D

BIO 471 - Seminar in Biological Sciences

Discusses and evaluates selected current topics in bioscience and biotechnology. Includes presentations by outside speakers.

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Senior

BIO 472 - Seminar in Biological Science

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Biological Sciences

Must have the following Classification(s):

Senior

Pre-Requisites: BIO 471 Minimum Grade: D

BIO 473 - Seminar in Biological Science

Credits: 2.00

College: College of Arts and Sciences

Department: Bioscience & Biotechnology

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
Must be enrolled in one of the following Major(s):
Biological Sciences
Must have the following Classification(s):
Senior
Pre-Requisites: BIO 472 Minimum Grade: D

BIO 480 - Special Studies Bio Sci

Covers special topics offered in biology. Current offerings include Biotechnology, Biology of Cancer, Ethnobiology, Neurobiology, and Bioinformatics, as well as other selected topics of interest in molecular biology, genetics, and biotechnology.
Credits: 12.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

BIO 497 - Research

Provides guided research in biology, molecular biology, microbiology, cell or human physiology, genetics, biochemistry, or biotechnology.
Credits: .50 to 12.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

BIO 498 - Independent Study

Provides independent study in biology, molecular biology, microbiology, cell or human physiology, genetics, biochemistry, or biotechnology.
Credits: .50 to 12.00
College: College of Arts and Sciences
Department: Bioscience & Biotechnology
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

Chemistry Courses

CHEM 050 - Preparatory Chemistry

This online course covered general chemical principles, such as stoichiometry, atomic and molecular structure, and characterization of chemical reactions.
Credits:
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

CHEM 100 - Chemistry
Chemistry and its significance to industry and life, with discussions revolving around synthesis and use of polymers and biologically significant molecules
Credits: 2.00
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

CHEM 101 - General Chemistry I

Covers fundamental principles of chemistry, stoichiometry, atomic and molecular structure, chemical bonding, states of matter, thermochemistry, and periodicity.
Credits: 3.50
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Co-Requisites: EXAM 080
Pre-Requisites: or CHEM 111 Minimum Grade: D

CHEM 102 - General Chemistry II

Covers chemical equilibrium, including acid-base equilibria in solution; electrochemistry; organic chemistry; polymers; and petroleum.
Credits: 4.50
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Co-Requisites: EXAM 080
Pre-Requisites: CHEM 101 Minimum Grade: D or TDEC 120 Minimum Grade: D or CHEM 161 Minimum Grade: D

CHEM 103 - General Chemistry III

Covers organic functional groups, biochemistry, inorganic and coordination compounds, chemical kinetics, thermodynamics, and nuclear chemistry.
Credits: 5.00
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Co-Requisites: EXAM 080
Pre-Requisites: CHEM 102 Minimum Grade: D or TDEC 121 Minimum Grade: D or (CHEM 162 Minimum Grade: D and CHEM 164 Minimum Grade: D)

CHEM 107 - General Chemistry

Introduction to organic chemistry and biochemistry
Credits: 4.00
College: College of Arts and Sciences
Department: Chemistry
Restrictions:
May not be enrolled in one of the following Program Level(s):

Continuing Education

CHEM 108 - Health Chemistry I

Covers physical and chemical properties of substances used in medical areas and related principles: atomic structure, bonding, gases, solutions, acids and bases, oxidation-reduction and the chemistry of hydrocarbon compounds and polymers. Examples are taken from pharmacology, nutrition and other allied health fields.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

CHEM 110 - Environmental Chemistry

Chemistry of the environment; the ecological aspects. Discussion of problems related to the pollution of the atmosphere, natural waters, and soil from a chemist's point of view.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

CHEM 111 - General Chemistry I

Not open to engineering or science majors. Introduces the principles of general chemistry. Covers SI units, unit factor calculations, states of matter, elements and compounds, energy, atoms, electronic configurations, ionic and covalent bonds, Lewis dot structures, shapes of molecules, chemical equations, stoichiometry, molarity, gas laws, nuclear chemistry, equilibrium between different states of matter, and some colligative properties of solutions.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following College(s)/School(s):

College of Arts and Sciences

CHEM 112 - General Chemistry II

Introduces organic chemistry. Covers some classes of organic compounds from alkanes to amines, basic reactions of important functional groups, uses of some compounds, stereochemistry, synthetic and natural polymers (carbohydrates, protein, DNA), and briefly acids and bases.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 111 Minimum Grade: D

CHEM 113 - General Chemistry I Laboratory

Covers chemical and physical properties and techniques for inorganic, organic, and polymeric compounds, including distillation, crystallization, chromatography, separation.

Credits: 1.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following College(s)/School(s):

College of Arts and Sciences

College of Engineering

Co-Requisites: CHEM 111

CHEM 114 - General Chem II Lab

Continuation of CHEM 113

Credits: 1.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following College(s)/School(s):

College of Arts and Sciences

College of Engineering

Co-Requisites: CHEM 112

CHEM 151 - Applied Chemistry

For business majors. Covers physical and chemical properties of substances used in consumer products. Provides qualitative introduction to required principles, including atomic structure and the elements, bonding and compounds, and the chemistry of carbon compounds and polymers. Uses examples from the areas of food and nutrition, pharmacology, and the petrochemical industry.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following College(s)/School(s):

College of Arts and Sciences

College of Engineering

Co-Requisites: EXAM 080

CHEM 161 - General Chemistry I

Covers atomic structure, stoichiometry, gases, valence theory, and thermochemistry.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 003 Minimum Grade: D or (MATH 001 Minimum

Grade: D and MATH 002 Minimum Grade: D)

CHEM 162 - General Chemistry II

Covers solutions, colligative properties, chemical equilibrium, and electrochemistry. Introduces organic chemistry.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 161 Minimum Grade: D or CHEM 101 Minimum Grade: D or TDEC 120 Minimum Grade: D

CHEM 163 - General Chemistry III

Continues organic chemistry. Introduces thermodynamics, molecular biology, inorganic chemistry, chemical kinetics, and nuclear chemistry.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 164 Minimum Grade: D and CHEM 162 Minimum Grade: D

CHEM 164 - General Chemistry Laboratory I

Involves experiments demonstrating the principles of gas behavior, thermochemistry, colligative properties, chemical equilibrium, and electrochemistry.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Pre-Requisites: CHEM 162 Minimum Grade: D

CHEM 165 - General Chem Lab II

Involves experiments illustrating the principles of organic separations, transition metal chemistry, complex ions, chemical kinetics, and qualitative analysis.

Credits: 2.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 163 Minimum Grade: D

CHEM 166 - Introductory Chemistry I

Introduces the principles and applications of chemical science, including atomic theory; chemical calculations; gases; and inorganic, nuclear, and environmental chemistry. Designed especially for students majoring in humanities; business and administration; and hotel, restaurant, and institutional management.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

CHEM 201 - Why Things Work: Everyday Chemistry

Course will cover chemical explanations of everyday materials and phenomena. The focus will be conceptual understanding, as opposed to a detailed quantitative treatment.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

CHEM 230 - Quantitative Analysis

Covers chemical analysis and data treatment, including chemical equilibrium, acid-base and redox reactions, and applications to gravimetric and titrimetric methods.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 102 Minimum Grade: D or TDEC 121 Minimum Grade: D or (CHEM 162 Minimum Grade: D and CHEM 164 Minimum Grade: D)

CHEM 231 - Quantitative Analysis Laboratory

Provides laboratory studies in quantitative analysis. This is a writing intensive course.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 230 Minimum Grade: D

CHEM 241 - Organic Chemistry I

Covers structure, reactions, and stereochemistry of organic compounds, especially alkanes, cycloalkanes, haloalkanes, and alkenes. Also covers SN1, SN2, E1, and E2 compound.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 102 Minimum Grade: D or TDEC 121 Minimum Grade: D or (CHEM 162 Minimum Grade: D and CHEM 164 Minimum Grade: D)

CHEM 242 - Organic Chemistry II

Covers structure, reactivity, and stereochemistry of organic compounds, especially alkanes, alkynes, alcohols, ethers, dienes, and aromatic compounds. IR, MS, and NMR spectral techniques are introduced and applied to the identification of organic compounds.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 241 Minimum Grade: D

CHEM 243 - Organic Chemistry III

Covers structure, preparation, reactivity, and stereochemistry of organic compounds, especially substituted aromatics, aldehydes, ketones, carboxylic acids, carboxylic acid halides, anhydrides, amides, polypeptides, esters, amines, phenols, and carbohydrates.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 242 Minimum Grade: D

CHEM 244 - Organic Chemistry Laboratory I

Introduces simple recrystallization, distillation, extraction, and chromatography techniques and applies them to several organic reactions illustrative of topics covered in CHEM 241. Provides opportunity to take and interpret IR and GC spectra.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 241 Minimum Grade: D

CHEM 245 - Organic Chem Lab II

Provides experiments illustrating a number of organic reactions covered in CHEM 242 as well as more advanced organic techniques.

Provides opportunity to take and interpret IR and GC scans.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 242 Minimum Grade: D and CHEM 244 Minimum Grade: D

CHEM 247 - Organic Chemistry Laboratory

Covers synthesis of typical organic compounds illustrative of the usual techniques in organic preparation. Spring.

Credits: 1.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Chemical Engineering

Pre-Requisites: CHEM 241 Minimum Grade: D

CHEM 252 - Physical Chemistry I

Thermochemistry; Covers gas properties, gas laws, equations of state, first, second and third laws of thermodynamics, energy and entropy, phase stability and phase transitions, phase diagrams.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: (CHEM 102 Minimum Grade: D and MATH 123

Minimum Grade: D) or TDEC 121 Minimum Grade: D or (CHEM 162

Minimum Grade: D and CHEM 164 Minimum Grade: D)

CHEM 256 - Physical Chemistry for Biological Sciences

Covers elementary chemical thermodynamics and homogeneous reaction kinetics as bases for experiment and phenomenology in biology and biochemistry, including properties of molecules in solution.

Credits: 4.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 101 Minimum Grade: D or CHEM 161 Minimum

Grade: D or TDEC 120 Minimum Grade: D

CHEM 261 - Org Chem Lab I-A

Introduces synthetic techniques and qualitative organic analysis. Fall.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 241 Minimum Grade: D

CHEM 262 - Organic Chem Lab II-A

Covers synthesis and reactions of polyfunctional compounds. Winter.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 242 Minimum Grade: D and CHEM 261 Minimum

Grade: D

CHEM 263 - Org Chem Lab III-A

Covers synthesis and reactions of aliphatic and aromatic compounds.

Includes use of instrumental methods in product identification. Spring.

Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 242 Minimum Grade: D and CHEM 262 Minimum Grade: D

CHEM 346 - Qualitative Organic Chemistry

Covers identification of pure organic compounds, physical constants, solubilities by semi-micro techniques, infrared and nuclear magnetic resonance spectroscopy, and separation and identification of mixtures. Credits: 5.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 243 Minimum Grade: D and CHEM 245 Minimum Grade: D

CHEM 354 - Physical Chemistry IV

Covers crystal structures, x-ray crystallography, lasers, modern aspects of spectroscopy, computational chemistry, and surface chemistry. Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEC 353 Minimum Grade: D

CHEM 355 - Physical Chemistry IV

Computational methods of modeling molecules; Covers potential energy functions and surfaces, molecular conformations, failures of classical physics, the quantum hypothesis, the classical wave equation and the origins of the Schrodinger equation, particle-in-a-box, linear variation functions, molecular orbitals from linear combinations of atomic orbitals, Pauli principle, molecular calculations and their interpretation. Credits: 3.00

College: College of Arts and Sciences
Department: Chemistry

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: CHEC 353 Minimum Grade: D

CHEM 356 - Physical Chemistry Lab

Provides experiments in physical chemistry for engineering students. Credits: 2.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHEM 241 Minimum Grade: D and TDEC 121 Minimum Grade: D

CHEM 357 - Physical Chemistry Lab I

Provides experiments illustrative of topics included in CHEM 251 and CHEC 352. This is a writing intensive course.

Credits: 2.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: CHEC 352

Pre-Requisites: (CHEM 251 Minimum Grade: D and PHYS 211 Minimum Grade: D) or CHEC 352 Minimum Grade: D

CHEM 358 - Physical Chemistry Lab II

Continues CHEM 357.

Credits: 2.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 252 Minimum Grade: D or CHEC 352 Minimum Grade: D

CHEM 361 - Adv Organic Chem Lab

Emphasizes experimental design, data collection, and interpretation in such areas as reaction mechanism and molecular structure determination. Not offered every year.

Credits: 2.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 243 Minimum Grade: D

CHEM 362 - Polymer Chemistry

Covers physicochemical aspects of polymer chemistry, including molecular weight determination, kinetics of addition and condensation polymerization, copolymerization, rheology and morphology, and thermodynamic treatments. Fall. Not offered every year.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 163 Minimum Grade: D

CHEM 363 - Polymer Chemistry Laboratory

Covers general techniques of polymer science, including synthesis, fractionation, molar mass determination, analytical techniques, and physical properties. Not offered every year.

Credits: 2.50

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 243 Minimum Grade: D

CHEM 364 - Spectroscopic Analysis

Covers interpretation of spectra for the determination of structure of organic molecules. Stresses use of infrared, nuclear magnetic resonance, and mass spectrometry. Fall. Not offered every year.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 243 Minimum Grade: D

CHEM 367 - Chemical Information Retrieval

This course examines methods for retrieving literature information, via standard tabulations, journals, and abstracts, using both hard-copy and electronic sources. Includes techniques for online searching of databases such as Chemical Abstracts, Beilstein, and crystallographic depositories.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

CHEM 420 - Molecular Symmetry and Group Theory-Chemistry

Applies the principles of simple group theory to molecular structure and to electronic and motional properties of molecules, including crystal field and molecular orbital methods.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 421 Minimum Grade: D

CHEM 421 - Inorganic Chemistry I

Covers crystal, atomic, and molecular structure; modern chemical bonding; and magnetic properties of inorganic systems.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 251 Minimum Grade: D or TDEC 202 Minimum Grade: D

CHEM 422 - Inorganic Chemistry II

Covers organometallic and coordination compounds, substitution mechanisms, and bio-inorganic chemistry.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 420 Minimum Grade: D

CHEM 424 - Special Chemistry Problems

Allows theoretical and laboratory investigations of a particular problem of interest to the individual student. A written report may be required.

Credits: .50 to 12.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

CHEM 425 - Inorganic Chemistry Lab

Covers synthesis of properties of inorganic compounds, magnetic measurements, spectroscopic properties, and interpretations of complex ion structure.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 422 Minimum Grade: D

CHEM 430 - Analytical Chemistry I

Provides an introduction to statistics (particularly the development and use of analytic calibration curves), basic electronics, and the principles of spectroscopic methods of analysis, including the interaction of light with matter and basic instrument design.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 242 Minimum Grade: D and CHEM 352 Minimum Grade: D

CHEM 431 - Analytical Chemistry II

Continues CHEM 430. Covers principles of chromatographic methods of analysis. Lab includes experiments on atomic absorption, fluorescence, infrared absorption, UV/visible absorption, gas chromatography, high performance liquid chromatography, basic electronics, and potentiometry/coulometry. This is a writing intensive course.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 430 Minimum Grade: D or TDEC 202 Minimum Grade: D

CHEM 465 - Synthetic Polymer Chemistry

Explores scope of polymer science; structure-property relations; step, free radical, cationic, group-transfer, metathesis, coordination, and ring-opening polymerizations; and stereochemistry of polymerizations and reactions of polymers.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 242 Minimum Grade: D

CHEM 466 - Physical Chemistry of Polymers

Covers kinetics and thermodynamics of polymerizations; control of polymerization processes; gelation theory; copolymerization; and determination of polymer molecular weight and distribution by membrane osmometry, light-scattering, solution viscosity, and other techniques.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEM 242 Minimum Grade: D and CHEM 251 Minimum Grade: D

CHEM 467 - Polymer Chemistry III

Covers spectroscopy of polymers; rubber elasticity; morphology; viscoelasticity; thermal analysis; computational methods; testing, fabrication, and processing; and magnetic and mechanical properties of polymers.

Credits: 3.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: CHEC 352 Minimum Grade: D or TDEC 202 Minimum Grade: D

CHEM 480 - Special Topics in CHEM

This course covers a selected special topic in chemistry. May be repeated three times for credit.

Credits: 5.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

CHEM 493 - Senior Research Project

Provides individualized research with a faculty member in any number of chemical disciplines. Requires written report. May be repeated three times for credit.

Credits: .50 to 12.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Chemistry

Must have the following Classification(s):

Junior

Senior

CHEM 497 - Research

Covers research problems in several areas of chemistry. Requires written report.

Credits: .50 to 12.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must be enrolled in one of the following Major(s):

Chemistry

Chemical Engineering Chemistry Courses

CHEC 352 - Physical Chemistry and Applications II

Equilibrium electrochemistry and transport; Covers electrochemical cells, Nernst equation, fuel cells, batteries, electrolytic solutions, transfer processes, Flick's laws, diffusion, ion transport, introduction to simple quantum mechanical systems.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: (PHYS 211 Minimum Grade: D or PHYS 153 Minimum Grade: D or TDEC 115 Minimum Grade: D) and (CHEM 252 Minimum Grade: D or TDEC 202 Minimum Grade: D)

CHEC 353 - Physical Chemistry and Applications III

Kinetics and spectroscopy; Covers reaction kinetics, steady state approximation, chain reactions and unimolecular reactions, optical spectroscopy; Beer's Law, atomic spectra/simple atomic models, rotational and vibrational spectra, Raman spectra, term symbols and selection rules, lasers, molecular statistics, partition functions.

Credits: 4.00

College: College of Arts and Sciences

Department: Chemistry

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: (PHYS 211 Minimum Grade: D or PHYS 153 Minimum Grade: D or TDEC 115 Minimum Grade: D) and (CHEM 252 Minimum Grade: D or TDEC 202 Minimum Grade: D)

Chinese Courses

CHIN 101 - Chinese I

Introductory Mandarin Chinese. Includes listening, speaking, and reading, with individual audiolingual practice. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

CHIN 102 - Chinese II

Continues CHIN 101. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 101 Minimum Grade: D

CHIN 103 - Chinese III

Continues CHIN 102. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 102 Minimum Grade: D

CHIN 201 - Chinese IV

Intermediate Chinese. Includes listening, speaking, reading, and writing, with individual audiolingual practice. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 103 Minimum Grade: D

CHIN 202 - Chinese V

Continues CHIN 201. Offered all terms.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 201 Minimum Grade: D

CHIN 203 - Chinese VI: Convers & Comp

Provides intensive practice in comprehension and written and oral communication. Emphasizes development of writing skills and increased oral competence in everyday situations. Offered as needed.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 202 Minimum Grade: D

CHIN 301 - Chinese VII

Advanced Chinese. Includes reading, writing, and extensive conversational practice. Offered as needed.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 203 Minimum Grade: D

CHIN 302 - Chinese VIII

Continues CHIN 301. Covers techniques of translation and communication. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 301 Minimum Grade: D

CHIN 303 - Chinese IX

Continues CHIN 302. Offered as needed.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Pre-Requisites: CHIN 302 Minimum Grade: D

CHIN 399 - Adv Independ Stud Chinese

Provides supervised study of special subjects in Chinese language and literature. Scheduled as needed.

Credits: .50 to 12.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 303 Minimum Grade: D

CHIN 411 - Intro Chinese Stylistics

Fourth year of Chinese. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 303 Minimum Grade: D

CHIN 431 - Intro Chinese Literature

Provides intensive reading, writing, and conversational practice in Chinese, based on selected texts in Chinese literature. Offered as needed.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 303 Minimum Grade: D

CHIN 451 - Intro Bus & Prof Chinese

Fourth year of Chinese. Provides intensive oral practice and written work in business, professional, and commercial Chinese. Offered as needed.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: CHIN 303 Minimum Grade: D

CHIN 480 - Chinese Minor Thesis Course

Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.

Credits: 4.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Communication Courses

COM 111 - Principles of Communication

Explores the importance of communication in organizational settings. Includes assessment of appropriate modes of communication, including written, spoken, and electronic.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

COM 150 - Mass Media and Society

Provides an overview of the history, economic structure, regulation, and impact of the mass media in the United States.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

COM 210 - Theory and Models of Communication

Surveys historical and contemporary attempts to understand the process of human communication, using examples from the literature of interpersonal, group, organizational, and mass communication.

Credits: 3.00

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

COM 260 - Fundamentals of Journalism

A workshop course in news reporting. Covers interviewing, editing, and writing for the mass media and for business, industrial, and trade publications. Explores the history of the field and changes in journalistic practices. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Pre-Requisites: HUM 102 Minimum Grade: D or HUM 105 Minimum

Grade: D or HUM 107 Minimum Grade: D or ENGL 102 Minimum

Grade: D or ENGL 105 Minimum Grade: D

COM 270 - Business Communication

Covers the writing of business letters, resumes, memos, proposals, and reports. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

COM 280 - Public Relations

The course focuses on the principles of public relations. It introduces students to theory and practice of PR taught in the context of real life material and situations. The course also covers main public relations techniques, tools, and types of publics.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Pre-Requisites: HUM 102 Minimum Grade: D or HUM 105 Minimum

Grade: D or HUM 107 Minimum Grade: D or ENGL 102 Minimum

Grade: D or ENGL 105 Minimum Grade: D

COM 281 - Advanced Public Relations

This course will focus on advanced aspects of public relations: how to analyze, plan, and conduct public relations campaigns systematically and scientifically. A great deal of attention will be paid to the analysis of real life public relations cases. At the end of the course students create full-scale PR plans, including budget and media material.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Continuing Education

May not have the following Classification(s):

Freshman

Sophomore

Pre-Requisites: COM 280 Minimum Grade: D

COM 290 - Sports and the Mass Media

To explore the interrelationships between professional and college sports and the mass media. Students will look at how news media coverage has changes sports, the conventions found in sports journalism, promotion and marketing of sports teams and leagues, and how sponsorship of sporting events changes the nature of these events.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 107 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

COM 300 - On-line Journalism

Students will explore how to use computers and the internet to add depth and context to news stories. Students will conduct database searches and analyses, and access a wide variety of records from governmental agencies, all in the pursuit of two news stories. The impact of journalism of blogging will also be studied; students will develop and maintain their own news blogs.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:
Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter
May not have the following Classification(s):
Pre-Requisites: COM 260 Minimum Grade: D

COM 305 - Sports Journalism

To gain a deeper appreciation for and understanding of the meaning-making power of sports journalism. We will explore the history of sports journalism, review and critique examples of historically significant sports writing and write game stories and columns based on actual coverage of local and on-campus sporting events.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: COM 260 Minimum Grade: D

COM 310 - Technical Communication

Develops skills in communicating technical information. Focuses on writing letters, resumes, proposals, reports, and instructions. Offers extensive writing practice along with exercises and presentations. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

COM 315 - Advanced Journalism

Mastery of investigative reporting tactics and strategies enables student to explore and write about issues of great importance to the community.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: COM 260 Minimum Grade: D

COM 316 - Environmental Info Campaigns

This reading and writing intensive, seminar-style course explores theories and practical aspects of environmental information campaigns and community-based social marketing campaigns. The theories and frameworks presented in this course apply to health issues as well as environmental issues. This course has a strong applied component.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Must have the following Classification(s):

Junior

Senior

COM 317 - Environmental Communication

This reading and writing intensive course will explore communication about environmental issues. Topics can include advocacy campaigns, social marketing, environmental journalism, media coverage of environmental issues, green marketing, the environment in popular culture, risk communication, and public participation.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Sophomore

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

COM 325 - The Cultural Significance of Fame

We will explore why fame is so important to us. Why do so many of us want it so badly? Why do we envy those who have it? What does the pursuit of fame say about us and about society? You will explore your own perception of fame, dissect your fame-related experiences, and analyze how the mass media keep us thinking and talking about fame.

Credits: 3.00

College: College of Arts and Sciences
Department: Culture and Communication
Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: COM 150 Minimum Grade: D

COM 330 - Professional Presentations

A workshop course in the theory and practice of making effective professional presentations for the technical and business professional.

Provides a systems approach to the planning, production, and presentation of visual/aural programs.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: COM 230 Minimum Grade: D

COM 335 - Writing for the World Wide Web

Electronic Publishing gives students applied and theoretical knowledge of professional electronic publishing. Students will focus on issues relating to writing and integrating text and graphics to create websites and on-line publications. Students will also consider how issues in document design and usability can be used to evaluate websites.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: ENGL 103 Minimum Grade: D or ENGL 105 Minimum

Grade: D or HUM 103 Minimum Grade: D or HUM 105 Minimum Grade: D

or HUM 108 Minimum Grade: D

COM 340 - Desktop Publishing

Covers production of publications using desktop publishing software, including planning, writing, designing, and budgeting of institutional magazines, newsletters, manuals, and brochures. Requires students to design several pieces (letterheads and flyers).

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D

or ENGL 105 Minimum Grade: A

COM 342 - English Worldwide

This course provides an overview of the spread of English globally, by examining English as a language of trade, diplomacy, and education, as well as its status as an aesthetic and market force. For a final project, students research how English is utilized for social, economic, and political purposes in a single area of the world.

Credits: 3.00

College: College of Arts and Sciences

Department: Culture and Communication

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D

or ENGL 105 Minimum Grade: A

COM 345 - Intercultural Communication

This course introduces students to the theory and practice of intercultural communication. Drawing from traditions in anthropology and communication, intercultural communication is the study of the effect of differing cultural norms and beliefs upon communication between speakers. Through a wide range of readings, journal writing assignments, and participative and experiential activities, students will develop both their understanding of and skills in inter-cultural communication. A final project and presentation draws together participative experiences and the readings and class discussions.

Continuing Education

MATH 100 - Fundamentals of Mathematics

Course covers properties of real numbers, algebraic expressions, rational expressions, linear and quadratic functions and graphs. This

course is intended to give students the background needed to enroll in MATH 101.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

MATH 101 - Introduction to Analysis I

Covers linear, quadratic, exponential, and logarithmic functions; systems of linear equations; elementary linear programming; matrix algebra; inverse; and mathematics of finance.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: or MATH 100 Minimum Grade: D

MATH 102 - Introduction to Analysis II

Covers limits, continuity, derivatives, indefinite and definite integrals, and applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: MATH 101 Minimum Grade: D

MATH 110 - Precalculus

Reviews topics from algebra, geometry, and trigonometry essential for the study of calculus. For students planning to take Calculus I

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

MATH 119 - Mathematical Foundations for Design

This course serves as an introduction to the mathematical concepts and tools most useful to students majoring in the Design Arts. Topics include functions, graphs, plane and fractal geometry, trigonometry, polar coordinates, and elementary topology.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Co-Requisites: EXAM 080

MATH 121 - Calculus I

Functions, limits and continuity, derivatives, transcendental functions, and applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: or MATH 110 Minimum Grade: D

MATH 122 - Calculus II

Definite integrals, Fundamental Theorem of Calculus, integration techniques, applications of integration, numerical integration and differential equations.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: MATH 121 Minimum Grade: D or TDEC 110 Minimum Grade: D

MATH 123 - Calculus III

Differential equations, Taylor's theorem, sequence and series, convergence, power series.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: MATH 122 Minimum Grade: D

MATH 180 - Discrete Computational Structures

Covers basic concepts of discrete mathematics that are important to computing, including elementary set theory, recurrence relations, and graph theory.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: MATH 102 Minimum Grade: D or MATH 121 Minimum Grade: D

MATH 181 - Mathematical Analysis I

Covers set theory, coordinate systems and graphs, functions, linear programming (geometric approach), matrices and linear systems, and linear programming (algebraic approach). Required for architecture, business administration, and construction management students. Non-credit for engineering and science students. Fall, Winter.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

MATH 182 - Mathematical Analysis II

Covers counting techniques, probability, statistics, and probability applications. Non-credit for engineering and science students. All terms.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Pre-Requisites: MATH 181 Minimum Grade: D

MATH 183 - Mathematical Analysis III

Covers limits, rates of change, derivatives, applications of differentiation, exponential and logarithmic functions, integrals, techniques of integration, applications of integration. Non-credit for engineering and science students. All terms.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Pre-Requisites: MATH 182 Minimum Grade: D

MATH 200 - Multivariate Calculus

Vectors, curves, partial derivatives, gradient, constrained optimization, coordinate system, multiple integrals, and applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Co-Requisites: EXAM 080

Pre-Requisites: MATH 122 Minimum Grade: D or TDEC 112 Minimum Grade: D

MATH 201 - Linear Algebra

Systems of linear equations, matrix algebra, determinants, vector spaces, eigenvalues and eigenvectors, orthogonality, diagonalization, applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Co-Requisites: EXAM 081

Pre-Requisites: MATH 121 Minimum Grade: D

MATH 210 - Differential Equations

Covers solution methods and properties for scalar and vector differential equations. Topics include linear and nonlinear equations, numerical methods, partial differential equations, separation of variables, and transform methods.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

Pre-Requisites: MATH 200 Minimum Grade: D and MATH 201 Minimum Grade: D

MATH 220 - Introduction to Mathematical Reasoning

A transition course that emphasizes critical reasoning skills necessary for later concept-oriented courses. Emphasizes writing and presentation skills. Topics taken from set theory, logic, induction, relations, functions, and properties of the real number system.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 201 Minimum Grade: D

MATH 221 - Discrete Mathematics

Elementary set theory, combinatorics, elementary number theory, graphs, and special topics chosen from formal language theory, graph algorithms, coding theory, and other applications.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: EXAM 081

Pre-Requisites: MATH 220 Minimum Grade: D or CS 270 Minimum Grade: D or (TDEC 114 Minimum Grade: D and ECE 200 Minimum Grade: D)

MATH 235 - Math Competition Problem Solving Seminar

Problems from math competitions (such as the Putnam exam) are solved by students in this course. This course may be repeated four times for credit as topics vary.

Credits: .50 to 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D

MATH 239 - Mathematics for the Life Sciences

A broad survey of mathematical topics that are fundamental for application in the life science: multivariate calculus, differential equations, elementary probability. Emphasis on application.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 102 Minimum Grade: D

MATH 261 - Linear Algebra

Covers matrix arithmetic systems of linear equations, including vector spaces, coordinate systems, determinants, characteristic value problems, and Euclidean spaces, and application to quadratic forms and linear differential equations. Problems from engineering and science will be solved using applications such as MATLAB during the lab.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following Major(s):

Mathematics

Pre-Requisites: MATH 189 Minimum Grade: D

MATH 262 - Differential Equations

Covers solutions of first-order equations, undetermined coefficient and variation of parameter methods of solution of higher order linear equations, systems of equations, and Laplace transform. Problems from engineering and science will be solved using applications such as MATLAB during the lab.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 261 Minimum Grade: D

MATH 279 - Special Topics in Mathematics

Covers topics in pure or applied mathematics. Different topics may be considered in different quarters.

Credits: 12.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

MATH 285 - Differential Equations II

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 210 Minimum Grade: D

MATH 286 - Applied Differential Equations

Reviews basic methods, including applications to electric circuits, chemical mixtures, mechanics, and motion problems. Introduces partial differential equations. Spring. Alternate years.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 285 Minimum Grade: D

MATH 290 - Linear Modeling for Engineers

Introduce linear methods for the analysis and solution of engineering problems. Content is taken from gaussian elimination, matrix algebra, inverse, determinants, Cramers Rule, matrix rank, eigenvalues, matrix differential equation least squares, series representation of functions and transforms. Applications are used to illustrate concepts.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Sophomore

Co-Requisites: EXAM 081

Pre-Requisites: TDEC 222 Minimum Grade: D

MATH 291 - Complex and Vector Analysis for Engineers

Complex and Vector Analysis for Engineers. Covers gradient, divergence, and curl; integral theorems curvilinear coordinates, complex differentiation and integration, Cauchy's Theorem, power series, residues and applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: TDEC 114 Minimum Grade: D and TDEC 115 Minimum

Grade: D

MATH 300 - Numerical Analysis

The primary goal of this course is to highlight the essential concepts in numerical methods: convergence, stability, and efficiency. A particular emphasis is placed on implementation. The main topics include

numerical integration, optimization, the FFT and spectral methods, boundary element method and an introduction to the finite element method.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D and MATH 201 Minimum

Grade: D

MATH 301 - Numerical Analysis II

A continuation of MATH 300. This course focuses on time dependent problems. It includes numerical solution of ordinary differential equation, the heat and wave equations, and moving interfaces. The discussed techniques include implicit schemes or ODEs, finite differences, spectral methods and the level set method.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 300 Minimum Grade: D

MATH 305 - Introduction to Optimization Theory

Provides a broad survey of mathematical techniques in optimization theory used in operations research and management science. Includes topics selected from the following categories: linear programming, integer programming, network flows, and nonlinear programming.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 201 Minimum Grade: D

MATH 310 - Probability and Statistics

Not open to mathematics or computer science majors. Covers probability, probability distribution of discrete and continuous random variables, moment-generating functions, distribution of sample statistics, estimation and statistical tests, tests for goodness of fit, and regression analysis.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not be enrolled in one of the following Major(s):

Computer Science

Mathematics

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D or TDEC 114 Minimum

Grade: D

MATH 311 - Probability and Statistics I

Covers sample spaces, axioms and theorems of elementary probability, random variables, distributions and expectation, mean, variance, moment-generating functions, Chebyshev's inequality, law of large numbers, and central limit theorem.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: EXAM 081

Pre-Requisites: MATH 200 Minimum Grade: D

MATH 312 - Probability and Statistics II

Covers estimation, consistency, unbiasedness, maximum likelihood, confidence intervals, hypothesis testing, Type I and Type II errors, Neyman Pearson lemma, likelihood ratio tests, and tests for means and variances.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: EXAM 081

Pre-Requisites: MATH 311 Minimum Grade: D

MATH 316 - Mathematical Applications of Symbolic Software

Mathematical Applications of Symbolic Software. Topics from calculus are investigated via complex problems requiring the use of symbolic mathematical software, primarily Maple. Numerical, graphical, and algebraic approaches are integrated. Limits, derivatives, root-finding, integration, and infinite series are explored in this context.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 121 Minimum Grade: D and MATH 122 Minimum

Grade: D and MATH 123 Minimum Grade: D and MATH 200 Minimum

Grade: D

MATH 318 - Mathematical Applications of Statistical Software

Mathematical Applications of Statistical Software. Applications of modern statistical technologies and software, such as SAS, are used to describe and analyze data. Some topics covered are data management, collecting data, inferences for single and multiple population means,

proportions count data, regression, correlation and nonparametric statistical methods. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 310 Minimum Grade: D or (MATH 311 Minimum Grade: D and MATH 312 Minimum Grade: D)

MATH 319 - Techniques of Data Analysis

An applied course that considers the acquisition, analysis, visualization, and presentation of data. Emphasizes computation.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

May not have the following Classification(s):

Freshman

Pre-Requisites: (MATH 310 Minimum Grade: D or MATH 312 Minimum Grade: D or STAT 201 Minimum Grade: D) and MATH 318 Minimum Grade: D

MATH 321 - Vector Calculus

Covers vector algebra; gradient, divergence, curl, and curvilinear coordinates; Green's theorem, divergence theorem, and Stokes' theorem; and applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D and MATH 201 Minimum Grade: D

MATH 322 - Complex Variables

Introduces functions of one complex variable. Topics include the basic properties of analytic functions, power series, integration, residues and poles, and conformal mapping with applications.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 210 Minimum Grade: D

MATH 323 - Partial Differential Equations

Covers basic concepts and solution techniques for the standard partial differential equations of mathematical physics.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D and MATH 201 Minimum Grade: D and MATH 210 Minimum Grade: D

MATH 331 - Abstract Algebra I

Covers theory of groups, homomorphism and isomorphism, theory of rings, integral domains, ideals, unique factorization, and theory of fields.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 220 Minimum Grade: D or CS 270 Minimum Grade: D

MATH 332 - Abstract Algebra II

Covers further topics in abstract algebra, including canonical decomposition of linear transformation, bilinear forms, multilinear algebra and determinants, finite fields, and selected short subjects.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 331 Minimum Grade: D

MATH 382 - Advanced Calculus

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

MATH 387 - Linear Algebra II

Covers linear transformations, including kernel and range; eigenvalues and eigenvectors; diagonalization of symmetric matrices; and application to differential equations, quadratic forms, and Markov chains. Fall.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 261 Minimum Grade: D

MATH 401 - Elements of Modern Analysis I

Covers the real number system, elementary topology, limits, infinite series, continuity, derivatives, and the Riemann integral.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D and MATH 201 Minimum

Grade: D and (MATH 220 Minimum Grade: D or CS 270 Minimum

Grade: D)

MATH 402 - Elements of Modern Analysis II

Covers continuation of integration theory, improper integrals, sequences and series, power series, and uniform convergence.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 401 Minimum Grade: D

MATH 422 - Introduction to Topology

Covers topological space, metric spaces, function, continuity, compactness, and connectedness.

Credits: 4.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D

MATH 449 - Mathematical Finance

This course is an introduction to the mathematics of finance. The main topics include: fixed income mathematics (duration, convexity, compounding conventions, immunization of bond portfolios, yield curve stripping), foundations of the arbitrage theory (pricing of futures and forwards, swaps, put/call parity) and introduction to stochastic derivative pricing (Black-Scholes and beyond).

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: MATH 311 Minimum Grade: D

MATH 450 - Introduction to Graph Theory

Introduction to Graph Theory. Topics covered include paths and cycles, Eulerian graphs, Hamiltonian graphs, trees, matching, coloring, planarity, and some additional topics in special graphs such as interval graphs.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 201 Minimum Grade: D and MATH 221 Minimum

Grade: D

MATH 475 - Cryptography

Classic cryptosystems, elementary number theory, RSA, ElGamal, discrete logarithms, digital signatures, plus a special topic selected from elliptic curves, information theory, and quantum cryptography.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: MATH 201 Minimum Grade: D and MATH 311 Minimum

Grade: D

MATH 480 - Spec Topics in Mathematics

Covers topics in Mathematics of interest to students or faculty.

Different topics may be considered during different quarters.

Credits: 12.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

MATH 483 - Discrete Event Simulation

Covers system simulation, Monte Carlo methods, discrete event modeling techniques, queuing models, programming considerations, statistical definitions and concepts, random number generation, output analysis, and design of computer experiments. Spring.

Credits: 3.00

College: College of Arts and Sciences

Department: Mathematics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 385 Minimum Grade: D

MATH 489 - Tensor Analysis

Covers tensor algebra, including coordinate transformations, fundamental quadratic form, covariant and contravariant tensors, Riemannian metric, and applications. Elective. Spring. Alternate years.

Credits: 3.00
College: College of Arts and Sciences
Department: Mathematics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: MATH 381 Minimum Grade: D

MATH 497 - Ind Study In Math

Provides supervised study of selected topics in mathematics.
Credits: .50 to 12.00
College: College of Arts and Sciences
Department: Mathematics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):

Philosophy Courses

PHIL 101 - Introduction to Philosophy

Surveys traditional issues and problems encountered in the practice of philosophy.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

PHIL 105 - Critical Reasoning

An introductory course. Designed to impart the skills of sound reasoning and argumentation useful in most fields.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D or ENGL 105 Minimum Grade: A

PHIL 111 - Beginning Logic

Provides an introduction to formal logic. Main topics include formal languages, propositional logic (syntax, semantics, and derivations), first-order predicate logic (syntax and semantics), and metalogical properties (satisfiability, logical truth, tautologousness, logical consequence, and validity).
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D or ENGL 105 Minimum Grade: A

PHIL 121 - History of Ideas

Examines changing worldviews from medieval times to the present, using analysis of historical documents and texts to illuminate the writers' goals and values and their assumptions about human nature and the world.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D or ENGL 105 Minimum Grade: A

PHIL 201 - Hist Of Western Philos I

Studies philosophical works from the eighth century B.C. to circa 1500. Emphasizes ancient Greek philosophy and its influence on Middle Ages thinkers, and scholasticism and its early critics.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade: D or ENGL 105 Minimum Grade: A

PHIL 202 - Hist Of Western Philos II

Studies philosophical works from 1500 to 1900. Emphasizes Continental Rationalism (Descartes, Leibniz, Spinoza) and British Empiricism (Locke, Berkeley, Hume), and reviews Kant's program and one or more 19th-century movements.
Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

PHIL 203 - Hist Of Western Philos III

Studies recent American, British, and/or Continental philosophers, such as Pierce, Dewey, Russell, Austin, Sartre, and Foucault.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: HUM 103 Minimum Grade: D or HUM 105 Minimum

Grade: A or HUM 108 Minimum Grade: D or ENGL 103 Minimum Grade:

D or ENGL 105 Minimum Grade: A

PHIL 207 - Intermediate Logic

Surveys several self-referential paradoxes, including Epimenides's famous liar paradox; discusses how they have been formalized to prove powerful results in mathematics, logic, and computational theory; and considers how these technical results have influenced philosophical discussions surrounding the mind/body problem, human cognition, and artificial intelligence.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHIL 111

PHIL 210 - Philosophy of Sport

An investigation into philosophical issues arising in sport. The analysis of the role of sport in individual fulfillment, in social and political processes, and in historical and cultural contexts. Topics will include: the metaphysics of sport; mind and body in sport; the aesthetics and ethics of sport; sport and culture; the connection of sport to philosophy.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Sophomore

PHIL 211 - Metaphysics

Studies classical and contemporary theories of reality and responses to questions bearing on the nature of time, the identity of persons, the nature of mind, and the free-will debate. Investigates recent challenges to the possibility of metaphysics.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 221 - Epistemology

Surveys major theories of knowledge in the modern Western philosophical tradition, including an examination of the roles of belief, truth, and justification in "knowing."

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 231 - Aesthetics

Examines philosophical theories of art, using readings drawn from philosophers, contemporary artists (literary, musical, and visual), and critics.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 241 - Social & Political Philos

Studies major works in social and political philosophy, including such authors as Plato, Aristotle, Hobbes, Locke, Mill, Marx, Nietzsche, and Marcuse.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 251 - Ethics

Considers problems central to ethics, including moral reasoning, obligation and motivation, moral incontinence, the nature of justice, and intentional action.

Credits: 3.00

College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PHIL 261 - Applied Ethics

Study of selected moral theories and standards encountered in the history of philosophy. Application of such theories and standards to moral problems arising in the practices of science, engineering, art, and communications.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PHIL 301 - Business Ethics

Takes a case-study approach to such moral issues as truth-telling, puffery, and lying in business communication; employer-employee relations; obligations to customers; obligations to foreign populations; and government contracts.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PHIL 305 - Communication Ethics

Undertakes a systematic study of moral problems arising in the context of public communications, including ethical problems encountered in organizational and mass communication.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: COM 210 Minimum Grade: D

PHIL 311 - Computer Ethics

Studies moral problems pertaining to the production of computer technologies, and provides ethical analyses of current laws and pending legislation aimed at regulating computer use.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):

Continuing Education
May not have the following Classification(s):
Freshman

PHIL 315 - Engineering Ethics

Provides critical reflection on the nature of engineering and technology and on the ethical obligations and responsibilities unique to the engineering profession. Topics include the social responsibilities of engineering, the nature of professionalism, professional autonomy, whistleblowing, conflicts of interest, organizational (dis)obedience, the ethics of risk assessment, and the place and purpose of engineering codes of ethics.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Must be enrolled in one of the following College(s)/School(s):
College of Engineering
May not have the following Classification(s):
Freshman
Sophomore

PHIL 321 - Biomedical Ethics

Studies moral issues related to health and disease, patients' rights and professional responsibilities, informed consent, abortion, euthanasia, and biomedical research.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PHIL 323 - Organizational Ethics

This course focuses on the application of ethical theories and principles to organizational systems and decision-making. Emphasis will be placed on how ethical principles affect and are applied to organizational policy-making, leadership behavior, systems of communication, technology use, and other systems of organization.
Credits: 3.00
College: College of Arts and Sciences
Department: English & Philosophy
Restrictions:
Must have the following Classification(s):
Junior
Pre-Junior
Senior

PHIL 325 - Ethics in Sports Management

An introduction to various ethical issues in sports and sports management. Topics will include: ethical issues of leadership and coaching; gender and racial equity in sports; fair play and cheating; violence and competition; commercialization of sports; the relation of sports to cultural value systems; ethics of technology and sports performance.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Sophomore

PHIL 330 - Ethical Issues in Criminal Justice

An introduction to the study of ethical issues associated with the criminal justice system. Topics include: a framework for ethical decision-making; the concept of professionalism; deception, coercion and use of force in law enforcement; criminal sentencing, prosecutorial misconduct, misuse of authority in penal institutions; white collar crime.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 331 - Philosophy and Public Policy

Studies conceptual and normative issues informing public policy. Investigates the structure of arguments and the nature of values relevant to the formation, justification, and criticism of public policy.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 335 - Global Ethical Issues

Offers an introduction to moral theories in the context of global ethical problems. Deals with the analytical and technological methods of addressing current global issues such as intellectual property, terrorism, nuclear energy, supranational organizations, space exploration, and the regulation of the Internet.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHIL 105 Minimum Grade: D

PHIL 341 - Philosophy of the Environment

Provides an ethical analysis of developments in science and technology affecting people and their working and home environments, including

such topics as air pollution, technology-engendered forms of cancer, and environmentally hazardous working conditions.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 351 - Philosophy of Technology

Studies the nature of technology; its relationships to science, economics, ethics, and art; and its role in shaping and being shaped by human values.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 361 - Philosophy of Science

Provides a philosophical study of scientific theorizing and scientific methods, including the nature of explanation, the structure of theories, observational and systematic justification of theoretical beliefs, and justification of change-of-theory.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 371 - Philosophy of Social Sciences

Provides a philosophical inquiry into the competing methodologies and presuppositions of the social sciences, with emphasis on foundational, Marxist, and critical approaches.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 381 - Philosophy in Literature

Explores several philosophical issues as they appear in major literary works. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHIL 391 - Philosophy of Religion

Analyzes the concept of God, including critical evaluation of arguments purporting to demonstrate the existence of such a being and examination of the problem of evil and such issues as religious mysticism, miracles, and the roles of faith and reason in religious life.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 399 - Independ Project In Philosophy

Provides supervised study of subjects/topics in philosophy.

Credits: 12.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHIL 475 - Special Problems in Philosophy

Topic for each term to be announced. May be repeated for credit.

Credits: 3.00

College: College of Arts and Sciences

Department: English & Philosophy

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Physics Courses

PHYS 100 - Preparation for Engineering Studies

This is a basic mathematics foundational course to prepare the students for the beginning sequence of Engineering Physics. Topics include: simultaneous equations, fundamentals of plane and solid geometry, use of trigonometric functions and vectors and translational kinematics.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Must be enrolled in one of the following College(s)/School(s):

College of Engineering

May not have the following Classification(s):

PHYS 101 - Fundamentals of Physics I

First of a four course sequence teaching fundamental physics to engineering and science majors. Topics include: description of motion, inertial and non-inertial frames, special relativity, Newton's Laws, translational and rotational equilibrium, one- and two-dimensional motion, fundamental forces, inverse square laws, Gauss' Law, Bohr's quantization, rotational dynamics, potential energy, black holes, determinism and chaos.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Co-Requisites: EXAM 080

Pre-Requisites: MATH 121 Minimum Grade: D

PHYS 102 - Fundamentals of Physics II

Second of a four course sequence teaching fundamental physics to engineering and science majors. Topics include: electrostatics, capacitors, charges in motion, insulators, semiconductors, conductors, superconductors, voltage and current measurements, magnetism, electromagnetic induction, magnetic materials, quantum dots, magnetic resonance phenomenon.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Co-Requisites: EXAM 080

Pre-Requisites: PHYS 101 Minimum Grade: D

PHYS 103 - General Physics I

Algebra-based course that covers force, motion, work, energy properties of matter, and wave motion and sound propagation.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHYS 104 - General Physics II

Algebra-based course that covers electricity and applications, magnetism, and optics.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PHYS 103 Minimum Grade: D

PHYS 105 - Computational Physics I

Introduces computational physics. Covers analytical and numerical solutions of equations governing the behavior of physical systems. Includes the use of Maple and simple FORTRAN/C/C++ programming methods to solve selected problems. Introduces UNIX, X-windows, programming languages, and visualization and data analysis tools for

problems in computational physics. Introduces elementary programming concepts as needed.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: (PHYS 111 Minimum Grade: D or PHYS 113 Minimum Grade: D) and CS 171 Minimum Grade: D

PHYS 106 - The Physics of High Fidelity

Applies physical principles to understanding how hi-fi systems work. Includes consumer education in selecting components. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHYS 111 - Physics I

Calculus-based course that explores principles of mechanics pertaining to kinematics, dynamics, momentum, and energy and conservation laws.

Credits: 4.50

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: MATH 121 Minimum Grade: D

PHYS 112 - Physics II

Calculus-based course that covers the nature of wave motions, including harmonic forces, general wave characteristics, acoustics, geometrical and physical optics, temperature, heat, heat transfer, black body, ideal gas, laws of thermodynamics, and heat engines.

Credits: 4.50

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 080

Pre-Requisites: PHYS 111 Minimum Grade: D

PHYS 113 - Contemporary Physics I

Part I in an introductory physics sequence for majors. This course combines the traditional lecture/lab format with real-time numerical simulations designed by the students. Topics include: the fundamental forces, Newton's laws, the atomic nature of matter, work and energy, light, friction, and atomic nuclei.

Credits: 5.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: MATH 121

PHYS 114 - Contemporary Physics II

Part II in an introductory sequence for majors. This course combines the traditional lecture/lab format with real-time numerical simulations designed by the students. Topics include: angular momentum, entropy, gas dynamics, electric fields, electricity and matter, and electric potential.

Credits: 5.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: MATH 122

Pre-Requisites: PHYS 113 Minimum Grade: D

PHYS 115 - Contemporary Physics III

Part III in an introductory sequence for majors. This course combines the traditional lecture/lab format with real-time numerical simulation designed by the students. Topics include: magnetic fields, electronics, radiation, waves and particles, and an introduction to semiconductor devices.

Credits: 5.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: MATH 123

Pre-Requisites: PHYS 114 Minimum Grade: D

PHYS 121 - Physical Science for Design I

Offers a non-calculus-based survey of physical science for students in design and the visual arts. Topics include kinematics in two dimensions, forces, Newton's laws, applications using the constant acceleration model, energy, momentum, conservation laws, universal gravitation, circular motion, satellites, oscillatory motion, wave motion, sound, and music.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must have the following Classification(s):

Freshman

Co-Requisites: EXAM 080

PHYS 122 - Physical Science for Design II

Continues PHYS 121. Topics include electricity, magnetism, em waves, light, geometrical and physical optics, anatomic structure, the elements, and nuclear decay and nuclear energy.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must have the following Classification(s):

Freshman

Co-Requisites: EXAM 080

Pre-Requisites: PHYS 121 Minimum Grade: D

PHYS 131 - Survey of the Universe

Provides an overview of modern astronomy, including the scientific method; telescopes; stars and star clusters; stellar evolution; galaxies and the large-scale structure of the universe; and the Big Bang. May also include periodic visits to the university observatory.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHYS 135 - How Things Work

This course examines the science behind everyday phenomena and devices. It uses real-world applications such as amusement park rides, microwave ovens, photocopiers, CDs, MRI, etc., as contextual vehicles to convey principles of classical and modern physics. It emphasizes conceptual understanding and uses pedagogy such as lecture demonstrations and active feedback.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Graduate Quarter

Undergraduate Quarter

PHYS 137 - Issues in Science and Religion

This survey course examines the interconnections and differences of science and religion, including topics as Cosmology, Human Origins, Prayer and Consciousness. Fundamental to the exploration of these theories are the examination of the historical, philosophical, psychological and sociological implications of these topics for society.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PHYS 141 - Atm Sci I: Clim/Glob Chng

The atmosphere and its structure and variations; greenhouse effect; ozone depletion; the influence of weather on man; air pollution; acid rain.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: PHEV 142

PHYS 142 - Atmospheric Science I Lab

Introduction to climate analysis and methods

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHYS 143 - Atmos Sci II-Wethr & Fore

The atmosphere and its properties; weather systems; severe weather; hurricanes; weather forecasting

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: PHEV 144

PHYS 144 - Atmos Science II Lab

Introduction to meteorological analysis and forecasting methods.

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 151 - Applied Physics

Non-calculus-based introductory physics for business majors. Covers basic mechanics and simple harmonic motion, followed by an introduction to more advanced topics such as relativity, electromagnetism, and quantum phenomena.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 081

PHYS 152 - Introductory Physics I

First part of a three-course algebra-based sequence providing a comprehensive introduction to Physics. Covers basic mechanics, including motion in 1, 2, and 3 Newton's laws, gravitation, energy, momentum, rotational motion and elastic properties of materials. Includes labs to enrich class material. High school physics not required.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 081

PHYS 153 - Introductory Physics II

Second part of a three-course algebra-based sequence providing a comprehensive introduction to Physics. Covers fluids, vibrations, waves, sound, heat and thermodynamics, geometrical optics and optical instrumentation. Includes labs to enrich class material.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 081

Pre-Requisites: PHYS 152 Minimum Grade: D or PHYS 101 Minimum Grade: D

PHYS 154 - Introductory Physics III

Third part of a three-course algebra-based sequence providing a comprehensive introduction to Physics. Covers fundamentals of electricity and magnetism, including charges, fields, potential, circuits, magnetic induction, electromagnetic waves, special relativity, and physical optics. Includes labs to enrich class material.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PHYS 101 Minimum Grade: D or PHYS 152 Minimum Grade: D

PHYS 160 - Introduction to Scientific Computing

Basic introduction to scientific problem solving and numerical modeling of physical system using Excel and Maple.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PHYS 171 - Solar Energy

Covers solar radiation, elementary heat transfer, properties of opaque and transparent materials, flat-plate and focusing collectors, energy storage, and solar heating systems.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 212 Minimum Grade: D

PHYS 181 - Astronomy

Provides an overview of modern astronomy, including the scientific method; telescopes; stars and star clusters; stellar evolution; galaxies and the large-scale structure of the universe; and the Big Bang. May also include periodic visits to the university observatory.

Credits: 3.00

College: College of Arts and Sciences

Department: Evening and Professional Studi

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 182 - Applied Physics I

Covers vectors; statics, kinematics, and classical dynamics, including Newton's laws, torque, projectile motion, and circular motion; work; power and energy; impulse and momentum; and rotation, in a non-calculus-based course. Fall.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 183 Minimum Grade: D and MATH 184 Minimum Grade: D

PHYS 183 - Applied Physics II

Covers fluids; elasticity; vibration, including simple harmonic motion; sound waves and acoustics; thermodynamics of temperature; heat; thermal-expansion; phase change; and heat transfer, in a non-calculus-based course. Winter.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 182 Minimum Grade: D

PHYS 184 - Applied Physics III

Covers light and illumination, electrostatics, potential, direct-current electrical circuits, magnetic fields, induction, generators, motors, and AC circuits, in a non-calculus-based course. Spring.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 183 Minimum Grade: D

PHYS 185 - Physics I

Covers vectors; statics, kinematics, and classical dynamics, including Newton's laws, torque, projectile motion, and circular motion; work; power and energy; impulse and momentum; and rotation, in a calculus-based course. All terms.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Co-Requisites: MATH 186

PHYS 186 - Physics I-A

Includes computer-augmented experiments in mechanics designed to give students experience in obtaining data and discovering the laws or principles that can be deduced from the results. Devotes time to elementary numerical analysis and basic computer programming for analyzing laboratory data. Fall, Winter, Spring.

Credits: 2.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 185 Minimum Grade: D

PHYS 187 - Physics II

Covers elasticity; vibration, including simple harmonic motion; sound waves and acoustics; and nature and propagation of light, including reflection, refraction, lenses and optical instruments, interference, diffraction, and polarization, in a calculus-based course. All terms.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 185 Minimum Grade: D

PHYS 188 - Physics II-A

Includes computer-augmented experiments in transverse wave motion, longitudinal wave motion, and incoherent and coherent (laser) optics.

Devotes time to elementary numerical analysis and basic computer programming for analyzing laboratory data. Fall, Winter, Spring.

Credits: 2.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 187 Minimum Grade: D

PHYS 201 - Fundamentals of Physics III

Third of a four course sequence teaching fundamental physics to engineering and science majors. Topics include: oscillations, EM waves, interference, diffraction, wave-particle duality, energy-matter equivalence, uncertainty relations, Schrodinger's equation, Hydrogen atom, laser, and nuclear physics.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Co-Requisites: EXAM 081

Pre-Requisites: PHYS 102 Minimum Grade: D

PHYS 202 - Fundamentals of Physics IV

Fourth of a four course sequence teaching fundamental physics to engineering and science majors. Topics include: statistical kinetic, equipartition of energy, entropy, ultra-low temperatures, thermal transport, interaction of charged particles and light with biological tissue, fiber optics, IR, Raman, spectroscopy, fluidics, and microfluidics.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Co-Requisites: EXAM 081

Pre-Requisites: PHYS 201 Minimum Grade: D

PHYS 211 - Physics III

Calculus-based course that covers phenomena and principles of electricity and magnetism, including electrostatics, potential theory, capacitance, direct currents, electrical instruments and circuits, magnetic fields, induced EMF, alternating currents, magnetic properties of matter, and inductance.

Credits: 4.50

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: EXAM 081

Pre-Requisites: MATH 123 Minimum Grade: D and PHYS 112 Minimum Grade: D

PHYS 217 - Thermodynamics

Covers macro-thermodynamics: temperature, pressure, work, heat, equations of state, the first and second laws of thermodynamics and their applications, heat engines and refrigerators, thermodynamics potentials, Maxwell relations, theory of phase changes, kinetic theory and transport phenomena.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PHYS 114 Minimum Grade: D or PHYS 112 Minimum Grade: D or PHYS 102 Minimum Grade: D

PHYS 222 - Modern Physics

Covers special relativity and the electron, black-body radiation, quantum theory of radiation, Bohr theory, wave particle duality, Schrodinger equation, and nuclear phenomena.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: MATH 200 Minimum Grade: D and PHYS 211 Minimum Grade: D

PHYS 223 - Modern Physics Laboratory

Requires students to perform experiments in modern physics, including the Millikan oil-drop experiment, the photoelectric effect measurement, spectrometer experiments, atomic spectra observations, the Frank-Hertz experiment, the decay rate of radon, and a beta particle range experiment. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Co-Requisites: PHYS 222

Pre-Requisites: PHYS 115 Minimum Grade: D or PHYS 211 Minimum Grade: D or PHYS 201 Minimum Grade: D

PHYS 226 - Instrumentation for Scientists I

Introduces measurement concepts, including a systems approach to analog and digital measurement, amplification and feedback, electrical data domains, measurements of varying analog signals, time domain measurements and conversions, and A/D and D/A conversions. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 227 - Instrumentation for Scientists II

Covers optimization of scientific measurements, including systems analysis, signal/noise, control of frequency response, modulation and demodulation, relation of sampling parameters to signal characteristics, and signal-to-noise ratio enhancement. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 226 Minimum Grade: D

PHYS 231 - Introductory Astrophysics

An introductory astrophysics course aimed at science majors. Topics include a treatment of orbits, Kepler's laws, celestial coordinates, light, blackbodies, optics, stellar structure and evolution, galactic formation, and large scale evolution and structure of the universe.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: (PHYS 111 Minimum Grade: D or PHYS 113 Minimum Grade: D) and MATH 121 Minimum Grade: D

PHYS 232 - Observational Astrophysics

Covers photometric and spectroscopic properties of stars, galaxies, and quasars and fundamental astrophysics of these objects. The course contains a significant lab component, which includes training in methods of observation, using the Joseph Lynch Observatory on campus to obtain astronomical measurements, and analysis of data.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: (PHYS 111 Minimum Grade: D or PHYS 113 Minimum Grade: D) and MATH 121 Minimum Grade: D

PHYS 281 - Physics III

Covers electrostatics, potential theory, capacitance, direct currents, electrical instruments and circuits, magnetic fields, induced emf, magnetic properties of matter, inductance, and alternating currents, in a calculus-based course. All terms.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 185 Minimum Grade: D

PHYS 282 - Physics III-A

Covers computer-augmented experiments in electrostatics, electric fields, circuits, and magnetic fields. Devotes time to elementary numerical analysis and basic computer programming for analyzing laboratory data. Fall, Winter, Spring.

Credits: 2.00

College: College of Arts and Sciences

Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 281 Minimum Grade: D

PHYS 283 - Introduction to Modern Physics

Covers the electron, black-body radiation, quantum theory of radiation, Bohr theory, special relativity, wave particle duality, and nuclear phenomena.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 211 Minimum Grade: D

PHYS 284 - Modern Physics Laboratory

Includes computer-augmented experiments in the study of the basic properties of elementary particles and the measurement of fundamental constants, radioactive properties of isotopes, and properties of atomic structure. Devotes time to elementary numerical analysis and basic computer programming for analyzing laboratory data.
Credits: 2.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 283 Minimum Grade: D

PHYS 285 - Physical Thermodynamics

Covers temperature and thermodynamic systems, equations of state and the laws of thermodynamics, and thermodynamic functions and transformations.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 281 Minimum Grade: D and MATH 189 Minimum Grade: D and MATH 200 Minimum Grade: D

PHYS 286 - Kinetic Thry & Stat Mech

Covers molecular velocities and transport phenomena, including Maxwell-Boltzmann, Fermi-Dirac, and Einstein-Bose statistics.
Credits: 3.00
College: College of Arts and Sciences

Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 285 Minimum Grade: D

PHYS 287 - Adv Electric & Magnet I

Covers electrostatics, Gauss' law, method of images, and solutions of Laplace's equation.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 281 Minimum Grade: D

PHYS 288 - Adv Electric & Magnetism II

Covers magnetic fields, interaction between currents, electromagnetic induction, and Maxwell's equations.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 287 Minimum Grade: D

PHYS 305 - Computational Physics II

Covers the application of computational techniques to problems in physics, including numerical solution of differential equations, computation and display of particle trajectories in arbitrary potentials, introduction to non-linear dynamics, random numbers and Monte-Carlo methods, and numerical implementation of selected methods in mathematical physics. Emphasizes hands-on experience in problem-solving, using both Maple and C.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: and CS 171 Minimum Grade: D PHYS 105 Minimum Grade: D

PHYS 306 - Computational Physics Laboratory I

Covers numerical solution of selected problems in electromagnetic theory, including solution of Laplace's equation, relaxation methods, computation of field lines and equipotentials, multipole expansions and computation of spherical harmonics, and solutions of Maxwell's equations and the wave equation.

Credits: 2.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 305 Minimum Grade: D and PHYS 322 Minimum Grade: D

PHYS 307 - Computational Physics Laboratory II

Covers numerical solution of selected problems in quantum mechanics, including solution of the time-independent and time-dependent forms of the Schrodinger equation; the matrix form of quantum mechanics, basis expansions, and bound-state solutions; and computation of wave packet propagation.

Credits: 2.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 305 Minimum Grade: D and PHYS 327 Minimum Grade: D

PHYS 311 - Classical Mechanics I

Covers motion in one, two, and three dimensions, conservation laws, and damped harmonic oscillator, forced harmonic oscillator, and central force motion.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 210 Minimum Grade: D and (PHYS 115 Minimum Grade: D or PHYS 201 Minimum Grade: D or PHYS 211 Minimum Grade: D)

PHYS 312 - Classical Mechanics II

Covers motion of system of particles, center of mass and conservation of linear momentum, description of collisions, Rutherford scattering, dynamics of rigid bodies, coordinate systems, the restricted three-body problem, generalized coordinates, Lagrange's equations and Hamilton's equations, and rotation of frame.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 311 Minimum Grade: D

PHYS 317 - Statistical Mechanics

Covers distribution molecular velocities, transport phenomena, Maxwell-Boltzmann statistics, and quantum statistics.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 210 Minimum Grade: D and PHYS 217 Minimum Grade: D

PHYS 321 - Electromagnetic Fields I

Covers fields due to specified charge distributions, Gauss' law, multipole expansion of the fields, Laplace's equation, method of images, dielectrics, and energy of an electrostatic field.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 311 Minimum Grade: D and PHYS 324 Minimum Grade: D

PHYS 322 - Electromagnetic Fields II

Covers electric current, continuity equation, electromotive forces, magnetic fields, electromagnetic induction, magnetic properties of matter, Maxwell's equations, radiation, and radiation by moving charges.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 321 Minimum Grade: D

PHYS 324 - Topics in Mathematical Physics

This course presents the mathematical background needed for Thermodynamics, Classical Mechanics, Electricity & Magnetism, and Quantum Mechanics using the theory of linear vector spaces and the standard tools of elementary mathematical physics. Emphasis will be placed on the use of analytic and numerical programming techniques, using Maple, FORTRAN and C.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 326 - Quantum Mechanics I

Explores the classical foundations of quantum mechanics, the Schrodinger equation, solutions of one-dimensional problems, and the one-dimensional harmonic oscillator.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 312 Minimum Grade: D

PHYS 327 - Quantum Mechanics II

Covers the three-dimensional Schrodinger equation, angular momentum, matrix mechanics, the hydrogen atom, and perturbation theory.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 326 Minimum Grade: D

PHYS 328 - Advanced Laboratory

Requires students to perform advanced laboratory experiments in the various fields of physics.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 227 Minimum Grade: D and PHYS 326 Minimum Grade: D

PHYS 381 - Theoretical Mechanics I

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 382 - Theoretical Mechanics II

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 383 - Optics I

Covers wave theory, electromagnetic theory, and geometrical and physical optics, including lenses, mirrors, fibers, thick lenses, optical systems, interference and interferometers, polarization, lasers, and instruments. Summer. Alternate years.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 187 Minimum Grade: D and MATH 189 Minimum Grade: D and MATH 200 Minimum Grade: D

PHYS 384 - Quantum Mechanics I

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 385 - Quantum Mechanics II

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 399 - Independent Study in Physics

Credits: 12.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHYS 405 - Advanced Computational Physics

Covers the application of computational techniques to one or more research topics of current interest, including grid-based solutions of partial differential equations in one and two dimensions and particle methods in fluid mechanics. Introduces high-performance computation and massively parallel computing platforms.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must have the following Classification(s):

Junior

Senior

Pre-Requisites: PHYS 305

PHYS 408 - Physics Seminar

Requires participation in weekly departmental colloquium.

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PHYS 409 - Astrophysics Seminar

This course focuses on topics in modern astrophysics. Each term, a series of papers in a subfield is chosen. Students present and discuss recent results in fields such as stellar structure, black holes, cosmology, and dynamics. May be repeated twice for credit.

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: PHYS 231 Minimum Grade: D or PHYS 232 Minimum Grade: D

PHYS 428 - Quantum Mechanics III

Advanced topics in quantum mechanics including spin, addition of angular momentum, scattering theory, relativistic quantum mechanics, atoms and molecules, and radiation from atoms.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 327 Minimum Grade: D

PHYS 431 - Galactic Dynamics

Covers dynamical problems in astrophysics, including the two-body problem, galactic stability, globular clusters, spiral arms and galactic collisions. Computational methods such as calculation of grid-based and particle-based potentials will also be discussed and applied.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 312 Minimum Grade: D

PHYS 432 - Cosmology

Covers cosmological models, age and distance scales in the universe, the hot big bang, primordial nucleosynthesis, inflation, baryonic and non-baryonic matter, galaxy formation and evolution, dynamics of structure formation, statistics of cosmological density fields, and cosmic background fluctuations.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 312 Minimum Grade: D

PHYS 451 - Quantum Structure of Materials

Introduces modern physics, including wave-particle duality; quantum mechanics of electrons located in one-dimensional potentials; introduction to solid-state physics; electronics in periodic potentials and energy band structure; numerical computations; metals, semiconductors, and insulators; electronic devices; quantum devices; and laboratory experiments in scanning tunneling microscopy and atomic force microscopy.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: TDEC 201 Minimum Grade: D and TDEC 222 Minimum Grade: D

PHYS 452 - Solid State Physics

Atomic basis of the physical properties of materials, including crystalline and non-crystalline solids. Detailed introductory treatment of the structural, vibrational, and electronic properties of solid and their inter-relationships. Overview of other materials, properties, and scientific basis of technological applications.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PHYS 317 Minimum Grade: D and PHYS 321 Minimum Grade: D and PHYS 326 Minimum Grade: D

PHYS 453 - Nanoscience

Scientific basis of nanoscale materials and systems including discussions of low-dimensional structures and their physical properties, the self-assembly of nanostructures, applications in various fields of science and technology, and techniques for fabrication and characterization on the nanoscale.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Co-Requisites: PHYS 321, PHYS 326
Pre-Requisites: PHYS 311 Minimum Grade: D and PHYS 217 Minimum Grade: D

PHYS 461 - Biophysics

A one course introduction to biological physics. Topics may include: structure of biomolecules, protein stability, electron transfer, protein folding, protein substrates, allostery, and self-assembly. No biological background is presumed.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Pre-Requisites: PHYS 317 Minimum Grade: D

PHYS 462 - Computational Biophysics

This course involves mathematical applications of biological simulations. Using classical and statistical mechanics, we will cover topics including atomic scale simulations, statistical sampling and models of molecular cellular systems and living processes.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Co-Requisites: PHYS 321
Pre-Requisites: PHYS 305 Minimum Grade: D and PHYS 317 Minimum Grade: D

PHYS 471 - Nonlinear Dynamics

This course introduces the basic ideas of the new science of nonlinear dynamics and develops methods to carry out fundamental computations of fractal dimension, Lyapunov exponents, and topological invariants.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Pre-Requisites: MATH 200 Minimum Grade: D

PHYS 476 - Nuclear and Particle Physics

Covers the nucleus as a neutron-proton system, including stable and unstable nuclei, nuclear spectra and radioactive decay, fission and fusion, quarks and leptons, experimental methods, fundamental forces, the quark model of hadrons, electroweak unification, and unifying theories.

Credits: 3.00
College: College of Arts and Sciences

Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Junior
Sophomore
Pre-Requisites: PHYS 327 Minimum Grade: D

PHYS 480 - Special Topics

Covers selected topics in physics. May be repeated for credit.

Credits: 12.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education

PHYS 485 - Research

Covers research problems in physics.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PHYS 491 - Senior Research I

A three-term sequence devoted to theoretical or experimental activities in a specific area of physics or atmospheric science to be chosen in consultation with a faculty adviser. Requires students to learn to identify interesting problems, develop a plan of attack, and carry the project to completion. Requires written and oral report at the end of the third term.

Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
Must have the following Classification(s):
Senior

PHYS 492 - Senior Research II

Continues PHYS 491.
Credits: 3.00
College: College of Arts and Sciences
Department: Physics
Restrictions:
May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman
Pre-Requisites: PHYS 491 Minimum Grade: D

PHYS 493 - Senior Research III

Continues PHYS 492. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PHYS 492 Minimum Grade: D

Physics-Environmental Science Courses

PHEV 141 - Atmospheric Science I: Climate and Global Change

Covers the atmosphere and its structure and variations, the greenhouse effect, ozone depletion, the influence of weather on humans, air pollution, and acid rain. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHEV 142 - Atmospheric Sci I Lab

Introduces climate analysis and methods. This is a writing intensive course.

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHEV 143 - Atmos Sci II: Wthr Anal/Forcst

Covers the atmosphere and its properties, weather systems, severe weather, hurricanes, and weather forecasting.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHEV 144 - Atmospheric Sci II Lab

Introduces meteorological analysis and forecasting methods. This is a writing intensive course.

Credits: 1.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PHEV 145 - Weather I: Climate and Global Change

Introduction to the Earth's atmosphere and climate system including the structure and interaction of the components of this system.

Students learn basic meteorological ideas and concepts. Special topics include weather satellite and Doppler radar imagery, daily weather discussions, the greenhouse effect and ozone depletion.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PHEV 146 - Weather II: Analysis and Forecasting

Course covers real problems of weather analysis and forecasting. Components focus on surface and upper-air weather maps, westerlies and the jet stream, mid-latitude cyclones, thunderstorms, tornadoes and hurricanes. Special topics include weather instruments and observations, atmospheric optics and climate analyses.

Credits: 4.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PHEV 346 - Atmospheric Dynamics

Covers equations of motion on a rotating earth; balanced horizontal motion and the thermal wind relation; equation of continuity; mechanism of pressure change; application of circulation and vorticity to atmospheric motion, viscosity, turbulence, and diffusion; and energy and stability relationships.

Credits: 3.00

College: College of Arts and Sciences

Department: Physics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: MATH 200 Minimum Grade: D and PHYS 211 Minimum Grade: D

Political Science Courses

PSCI 100 - Introduction to Political Science

Studies the political process, which determines who gets what, when, and how in society.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSCI 110 - American Government I

Introduces the elements of the American political system.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSCI 120 - History of Political Thought

Introduces the Western tradition of political thought, examining a selection of works by major political thinkers. Draws on primary sources, with a textual and conceptual emphasis.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSCI 130 - Research Methods in Political Science I

Introduction to basic principles of political science writing and research design. Students learn how to locate, use, and evaluate information from a wide range of government agency websites and political science databases.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PSCI 140 - Intro Comp Political Analysis

Examines methods used to compare state political systems with respect to world order values in varying geographic and cultural settings.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 150 - International Politics

Analyzes nation-states in their external relations, including the interaction of the great powers with each other and with emerging areas.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSCI 210 - American Government II

Provides a structural analysis of selected social, economic, and political institutions at various levels of government in the American political system.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PSCI 110 Minimum Grade: D

PSCI 220 - Constitutional and Judicial Process

Examines powers conferred by the Constitution within the federal system.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: PSCI 110 Minimum Grade: D

PSCI 230 - Research Methods in Political Science II

This course is designed to provide the student with concepts, principles and tools of research methodology. Includes projects such as survey and content analysis.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: PSCI 130 Minimum Grade: D

PSCI 240 - Comparative Government

Examines the political process through the ideology and institutions of major constitutional and totalitarian powers.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PSCI 140 Minimum Grade: D

PSCI 243 - Economic Geography

Introduces the role of geography in economic, technological, and urban development, including an analysis of the economic potential of world regions.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 245 - Intro 20th -cent Middle East

Investigates the significant ideological, political, economic, and cultural changes the Middle East has experienced in the past century. Aims to challenge common stereotypical images of the governments and people of the region.

Credits: 3.00

College: College of Arts and Sciences
Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 250 - American Foreign Policy

Examines current issues in American foreign policy, including the assumptions underlying policy goals, the means of achieving them, and the decision-making machinery.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Pre-Requisites: PSCI 150 Minimum Grade: D

PSCI 255 - International Political Economics

Analyzes the contradiction between the political-military world and the newly emerging trading world, and its impact on future global political systems.

Credits: 4.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 270 - Problems of Individual Liberty and Government Authority

Examines the relationship between personal freedom and a just society from a variety of perspectives, all of which are designed to serve as an introduction to history and politics.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PSCI 120 Minimum Grade: D

PSCI 272 - Contemporary Political Issues

Examines a current policy issue in its political context. See departmental brochure for subject scheduled in a particular term. May be repeated for credit.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 310 - US Political Party/Pressure Grp

Examines the organization and function of political parties and pressure groups and their impact on the American political system.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 313 - State & Local Government

Examines major political, social, and economic problems of state, local, and metropolitan governments.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 315 - Public Administration

Covers preparatory skills for careers in public service, including personnel administration, decision-making, and communications.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 317 - Legislative Behavior

Investigates the roles, rules, procedures, and behavior of legislative bodies and their members. Emphasizes the U.S. Congress, but uses a comparative approach to investigate state, local, and international bodies.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 319 - Executive Behavior

Covers dynamics of behavior within bureaucracies, both public and private, with emphasis on the role of the chief executive.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 323 - Comparative Political Thought

Studies modern political thinkers from African, Asian, Latin American, and other traditions of political thought. Uses a textual and conceptual emphasis, but also considers the political movements and social practices that have embraced or given birth to the works of the selected authors.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 327 - Democratic Theory

Examines the works of various classical and contemporary thinkers on the nature, justification, and practice of democracy. Emphasizes matters of liberty, equality, participation, and social choice.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 329 - Theories of Justice

Examines the nature and realization of justice in modern societies, with special attention to contemporary questions of civil rights.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 330 - Public Opinion & Propaganda

Examines public opinion and propaganda from a variety of perspectives, including the process of opinion formations and change and its role in the development of public policy and methods of measurement and analysis of public opinion.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 331 - Environmental Politics

Examines environmental politics, focusing on the United States. Solving environmental problems is not simply a question of using available science and technology; rather, proposals to combat environmental degradation confront political context that may or may not favor the aims of environmental policy. Understanding politics is therefore indispensable for effective environmental problem-solving.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PSCI 335 - Political Communication

Introduces an investigation of the relationship between politics and communication, with the goal of developing an understanding of political communication's role in election campaigns, news coverage, political debates, political advertising, and "normal" portrayals of the political system through media and interpersonal communication.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 340 - Politics of Developing Nations

Analyzes problems of political and economic development (modernization) in the Third World, with the focus on Africa.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 345 - Compar Politics Middle East

Introduces students to political issues and challenges that face Middle Eastern men and women and deepens their understanding of comparative politics in non-Western cultures and nations. Analyzes such common problems as nationalism, religion, and state/society relations, then examines in depth four countries representing various regimes. Assumes some familiarity with Middle Eastern history and concentrates primarily on contemporary politics and political economy.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 351 - International Organizations

The goal of this course is to present an overview of the nature and function of international organization in world politics. The role of the United Nations and its agencies are highlighted, but other organizations are considered. Students gain an understanding of how international life is structured through these institutions.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

PSCI 352 - Ethics and International Relations

Are ethics relevant in world politics, or are power and survival the only concerns? This course considers the main moral issues facing the international community. Topics include the "just war" tradition, human rights, humanitarian intervention, and what rich countries owe the poor.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

PSCI 353 - International Human Rights

This course examines the origin of the international human rights movement after World War II, and discuss key issues confronting the international community today. These include genocide, political repression, the rights of women, and religious and cultural minorities. It also considers the moral basis of the rights ideal.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):
Undergraduate Quarter

PSCI 354 - US & the Third World

Analyzes American foreign policy since 1945 with particular emphasis on the United States rise to power as the major influence in the developing world of Africa, Asia, Latin America, and the Middle East.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PSCI 357 - The European Union

This course combines an introduction to the history and institutions of the European Union with a special analysis of EU enlargement and institutional reform.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education

PSCI 358 - Political Economy of Japan

Examines Japanese political economy on a global scale, focusing on her economic and trade relations with the United States, the Soviet Union, China, and Western Europe.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PSCI 363 - Civil Liberties

Examines protections afforded the individual under the Constitution.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PSCI 365 - Politics, Law, & Justice

Examines justice as politically determined, including the personnel, policies, and practices of units of the legal system, especially civil, criminal, and juvenile courts in urban areas.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PSCI 367 - International Law

Examines the legal norms, codes resolutions, treaties conventions, court decisions, customs and other sources that comprised international law. Provides analysis of applications, especially in Europe.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):
Continuing Education
May not have the following Classification(s):
Freshman

PSCI 370 - Topics in Public Policy

Provides an in-depth exploration of an important public-policy issue or issue area in American or international life. Explores the origins,

development, alternatives, and future consequences of an issue within the context of a political system. May be repeated for credit.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 371 - Science, Technology, & Public Policy

Examines the political effects of technological change, including public policy efforts to affect the impact of scientific development. Covers topics including atomic energy, electronic communications, and weapons development.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 372 - Urban Politics

Course focuses on classic texts that deal with the nature of urban society, politics and power in the urban context, and urban political economy. Looks particularly at American cities.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PSCI 373 - American Policy Process

Course takes students from the point of policy formulation in Congress and the White House, to the point of policy implementation in one of the Cabinet departments. Specific policy areas covered include education, welfare, transportation, housing, urban development, and agriculture.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PSCI 110 Minimum Grade: D or PSCI 210 Minimum Grade: D

PSCI 374 - Politics of Sport

The material in this course comes from a variety of disciplines and schools of thought with political science serving as an overarching framework. Issues covered include ethnicity, gender, race, nationalism, globalism, economics, and class.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

PSCI 470 - Jun Seminar Political Science

A research seminar directed by a political scientist. Requires students to write an extended paper on a topic selected in consultation with the instructor. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Must have the following Classification(s):

Junior

Senior

PSCI 472 - Spc Studies Political Science

Provides supervised individual study of special subjects in political science. May be repeated for credit.

Credits: 12.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 490 - Senior Seminar I

Requires an intensive research project supervised by a political scientist. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSCI 491 - Senior Seminar II

Requires completion of the project begun in PSCI 490. This is a writing intensive course.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

Pre-Requisites: PSCI 490 Minimum Grade: D

PSCI 492 - Political Science Honors Thesis I

Students develop and begin an in-depth research project under the supervision of a political scientist. Course is restricted to seniors with a minimum 3.30 GPA.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Must be enrolled in one of the following Major(s):

Political Science

Must have the following Classification(s):

Senior

Pre-Requisites: PSCI 210 Minimum Grade: D and PSCI 220 Minimum

Grade: D and PSCI 230 Minimum Grade: D and PSCI 240 Minimum

Grade: D and PSCI 250 Minimum Grade: D and PSCI 270 Minimum

Grade: D

PSCI 493 - PSCI Honors Thesis II

Students complete an in-depth research project under the supervision of a political scientist.

Credits: 3.00

College: College of Arts and Sciences

Department: History & Politics

Restrictions:

Must be enrolled in one of the following Program Level(s):

Undergraduate Quarter

Must be enrolled in one of the following Major(s):

Political Science

Must have the following Classification(s):

Senior

Pre-Requisites: PSCI 492 Minimum Grade: D

Psychology Courses

PSY 101 - General Psychology I

Reviews the fundamental principles, concepts, and methods of psychology, with emphasis on the concepts of motivation, learning, and perception, and their psychological foundations.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSY 111 - Preprofessional Gen Psych I

Preprofessional General Psychology is designed for majors and for other preprofessionals who are interested in Psychology as a minor. A scientific approach to the study of psychology is taken. An overview of the fundamental principles of psychology across a variety of sub-disciplines is offered. Part one is part of a two-part sequence and focuses on the experimental bases of psychology.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSY 112 - Preprofessional Gen Psych II

Preprofessional General Psychology is designed for preprofessionals who are interested in psychology or related fields, especially designed for majors, and may be taken by minors of psychology. It follows Preprofessional General Psychology I and includes a laboratory component to enhance the scientific approach to psychology. Part two focuses on the application of scientific principles of psychology to human behavior.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

Pre-Requisites: PSY 111 Minimum Grade: D

PSY 120 - Developmental Psychology

Examines the nature of developmental processes-perceptual, intellectual, emotional, and social-and the factors influencing and limiting them.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSY 140 - Approaches to Personality

Discusses the major concepts of Freud, neo-Freudians, behaviorists, humanists, trait theorists, and others. Emphasizes understanding of self and others for psychotherapy and research. Fall.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSY 150 - Introduction to Social Psychology

Examines theoretical and research findings in personal experiences of interacting with others in family and group settings, and with society in general.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

PSY 210 - Evolutionary Psychology

Covers principles of genetics and evolution as applied to the behavior of the important types of living beings, from plants and unicellular organisms to the primates (including humans).

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSY 212 - Physiological Psychology

Reviews neural foundations of behavior, including the study of nerve activity and brain function.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

Restrictions:

May not be enrolled in one of the following Program Level(s):

Continuing Education

May not have the following Classification(s):

Freshman

PSY 213 - Sensation and Perception

Examines the structure and function of the senses, including vision, hearing, touch, temperature, pain, olfaction, gustation, time, and kinesthesia. Considers interaction of the senses and their role in determining behavior.

Credits: 3.00

College: College of Arts and Sciences

Department: Psychology

SOC 374 - Restorative Justice

Restorative justice is a paradigm shift in criminal justice in response to the failure of the traditional retributive model to meet the needs of victims, offenders and the community. Programs have developed worldwide often sponsored by governments, others by non-profits, to handle both juvenile and adult criminal offences more effectively.
